Wi-Fi 6 for IP-based connections

The new Wi-Fi 6 for all DSL and VDSL connections including 35b supervectoring:
The FRITZ!Box 7530 AX has the latest technology on board, effortlessly connecting all your devices to the Internet.

Wi-Fi 6 – next-generation Wi-Fi for all devices

Smartphones, tablets, game consoles and computers - the number of devices per household is increasing all the time. The FRITZ!Box 7530 AX is designed for this and supports next-generation Wi-Fi 6. New transmission methods ensure top Wi-Fi speeds. And best of all: Wi-Fi 6 achieves optimal data rates even when you've got multiple devices connected to your home network at the same time.

Established standards such as Wi-Fi 5 and 4 also ensure compatibility with all devices.

Mesh Wi-Fi with FRITZ!

The FRITZ!Box 7530 AX supports Mesh Wi-Fi, meaning your videos, music and photos seamlessly reach every corner of your home, apartment or office. How does it work? The FRITZ! devices work together as part of a single network, communicating with each other and optimizing your wireless devices and network usage.

With Mesh you can enjoy high speeds while surfing, streaming or gaming. Instead of waiting for breathtaking HD television and your favorite music, your media will wait for you.

A convenient telephone system for IP-based connections

The FRITZ!Box 7530 AX includes a telephone system for modern IP-based connections. With DECT you can create a telephone system with up to six cordless phones. There are also ports for connecting your analog telephone or fax machine. Multiple answering machines, online telephone books and numerous convenience features make phone calls via the FRITZ!Box 7530 AX a joy.

A variety of connections

The FRITZ!Box 7530 AX is suitable for all DSL connections up to 300 Mbit/s. Whether ADSL, ADSL2+, VDSL or 35b supervectoring: Your FRITZ!Box establishes the connection, meaning you can sit back and enjoy high-speed Internet access. Four gigabit LAN ports and one USB port offer a wide range of options: Not only can you use these to easily integrate all your terminal devices, they also mean you can integrate your printer into your home network and provide USB storage media. This means you can access your videos, pictures and music whenever and wherever you like.

FRITZ!OS – a fully loaded operating system

FRITZ!OS, the operating system for your FRITZ!Box, is updated with new features on a regular basis. With the FRITZ!Apps you can also use your smartphone to access your data from anywhere, make landline calls in your home network, or control your Smart Home. Alongside FRITZ! Smart Home devices, the FRITZ!Box 7530 AX also supports a wide range of devices with HAN FUN and DECT ULE wireless technology from other manufacturers. And of course, all updates and apps for FRITZ! products are free of charge.

FRITZ!Box for safety's sake

You're always on the safe side with FRITZ!Box! The comprehensive security concept protects your communications. It undergoes constant testing and development. Thanks to the free updates, you can always rest assured.

Compatible with any connection

You can use your FRITZ!Box with any DSL- and IP-based connection. Alternatively, you can run it behind a fiber optic or cable modem and simply integrate it into an existing Wi-Fi network. It can even be operated with a 4G/3G dongle.

At home anywhere with MyFRITZ!

With MyFRITZ! from AVM, benefit from secure and convenient access to your FRITZ!Box from anywhere in the world. Retrieve files stored in FRITZ!NAS, view your recent call list and listen to messages left on your answering machine. With MyFRITZ!App, you can even access your FRITZ!Box remotely using your smartphone or tablet.

Peace of mind

FRITZ!Box offers comprehensive protection against attacks. The preconfigured firewall, filter function, and DECT and Wi-Fi encryption ensure secure connections. Parental controls and guest Internet access are, of course, included free of charge.

Encrypted communication via VPN

With the modern WireGuard protocol and the proven IPSec standard, you can establish a secure connection to your FRITZ!Box via VPN or connect several FRITZ!Box networks with each other. The settings can be carried out directly in the FRITZ!Box and quickly transferred to smartphones, tablets and computers.

Ready for the future with IPv6

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
itworkup.co.za | sales@itworkup.co.za | +27 (11)541-9950

In addition to IPv4, FRITZ!Box supports the IPv6 Internet protocol. IPv6 makes existing services more convenient and simplifies a host of new applications, so you can rest assured that you’re ready for the latest technologies.

Mesh Wi-Fi with FRITZ!

With FRITZ! your Wi-Fi grows to whatever size you need at the touch of a button. Combine FRITZ!Box with the intelligent FRITZ!Repeaters and FRITZ!Powerline to adjust your home network to your individual needs and enjoy full Mesh convenience with FRITZ!.

Wi-Fi 6

Wi-Fi 6 offers extremely fast and reliable connection options. It's designed to enable reliable and fast transmission rates even when multiple end devices are being used at the same time.

Wi-Fi guest access

Offer your guests simple Internet access. The guest access has its own network key and name. It's possible establish a welcome page for customers in cafés or guests at home. Visitors have no access to the home network, so your data stays private.

FRITZ!Box as a private hotspot

When using your FRITZ!Box as a hotspot, you can restrict Internet usage to surfing and e-mail. You have a usage log, while your guests benefit from an integrated QR code that makes it easy for them to connect to the Internet.

Complete Wi-Fi control

Wi-Fi on or off? You can either leave it completely to the automated Wi-Fi night service or take care of it yourself using the “WLAN” button on your FRITZ!Box. Alternatively, you can use FRITZ!Fon as a convenient remote control.

Secure ex works
