Model: 38228

Manufacturer: LINDY

EAN: 4002888382281

Product Code: 1697314

R7,793

This HDMI® 4x1 Multi-View Switch is a high-performance video switch designed for 4K displays, enabling signals from up to four different Ultra HD sources to be seamlessly integrated for simultaneous display on a single monitor. With four distinct viewing modes (Quad-View, Full Screen, Picture in Picture, and Dual Video), this Multi-View switch accommodates the monitoring of multiple video sources in various configurations supporting Ultra HD 4K resolutions on both input and output.

In mission-critical environments, the switch ensures optimal performance through seamless switching, eliminating frame loss during transitions between connected source devices or different picture modes. It offers a cost-effective switch for different applications such as;

Digital Presentations

CCTV Surveillance & Control

Video Conference & Meeting rooms;

The switch allows independent switching between audio and video channels, offering flexibility in
