Ubiquiti G3 Gate Starter Kit security access control system Black, Gray, White

Model: UA-G3-SK-Gate

Manufacturer: UBIQUITI

EAN: 810177162001

Product Code: 1697739

R16,713

COMPREHENSIVE ACCESS CONTROL SOLUTION FOR GATES

The Ubiquiti G3 Gate Access Starter Kit is designed to provide an all-in-one solution for managing access control at a single gate. This starter kit includes a Gate Hub, G3 Intercom, PoE++ adapter, and two 2-wire Retrofit Extenders, ensuring seamless integration and functionality. With the ability to support up to 6,000 users, this system is ideal for both residential and commercial applications, allowing for efficient management of entry points with advanced security features.

ADVANCED TOUCH PASS TECHNOLOGY INCLUDED

Included with the G3 Gate Access Starter Kit are 10 free one-year Touch Passes, enabling users to enjoy a modern, contactless entry experience. The Touch Pass feature allows for quick and secure access through NFC-enabled cards and keyfobs, enhancing convenience for users while maintaining high security standards. This innovative technology streamlines the entry process, making it ideal for busy environments where efficiency is paramount.

ROBUST AND WEATHER-RESISTANT DESIGN

Constructed from durable polycarbonate and aluminum alloy, the G3 Gate Access Starter Kit is built to withstand various environmental conditions. The intercom unit is rated IP65 for weatherproofing, making it suitable for outdoor use when paired with a waterproof junction box. With an operating temperature range of -30 to 60°C (-22 to 140°F) and humidity tolerance of 5 to 90% non-condensing, this system is engineered to perform reliably in diverse climates.

FLEXIBLE POWER AND CONNECTIVITY OPTIONS

The G3 Gate Access Starter Kit utilizes PoE++ technology, allowing for efficient power delivery and network connectivity through a single cable. This setup simplifies installation and reduces the need for additional wiring. The kit features multiple networking interfaces, including five 10/100/1000 Base-T ports, ensuring robust connectivity options for various devices. The maximum power consumption of 22W without PoE output and 60W with PoE output provides flexibility for powering additional devices as needed.

USER-FRIENDLY MANAGEMENT AND INTEGRATION FEATURES

The G3 Gate Access Starter Kit is compatible with the UniFi Access management application, allowing for easy configuration and monitoring of access points. The integrated camera and two-way intercom functionality enhance communication and security, enabling users to visually verify visitors before granting access. With features like mobile unlock, face unlock, and PIN access, this system offers multiple layers of convenience and security, making it a versatile choice for modern access control needs.
