The iStorage datAshur PRO+A holds the distinction of being the world’s first flash drive to receive the FIPS 140-3 Level 3 certification! It is a user-friendly USB 3.2 Gen 1 Type-A encrypted flash drive that seamlessly combines ease of use with top-level security measures, providing government agencies and organisations with trusted protection for sensitive and confidential data. It employs PIN protection and hardware encryption to safeguard your data to military-grade standards. Available in 32GB, 64GB and 128GB capacities, this innovative device ensures your information remains secure.

It has also achieved NLNCSA BSPA certification, a security assessment by the Netherlands’ National Communications Security Agency for cryptographic products, further validating its compliance with rigorous national security requirements for safeguarding sensitive information.

Government accreditations

The datAshur PRO+A holds the distinction of being the world's first flash drive to achieve FIPS 140-3 Level 3 certification, the gold standard for protecting highly confidential and classified data trusted by government agencies and enterprise organisations worldwide. It has also achieved NLNCSA BSPA certification, a security assessment by the Netherlands' National Communications Security Agency for cryptographic products, further validating its compliance with rigorous national security requirements for safeguarding sensitive information.

Transfer your files in seconds

Lightning fast backwards compatible USB 3.2 (Gen1) data transfer speeds of 300MB/s Read & 239MB/s Write.

OS & platform independent

With no software required. Cross-platform compatible with: MS Windows, macOS, Linux, Android, Chrome, Thin Clients, Zero Clients, Embedded Systems, Citrix, VMware, DVR’s, Medical Equipment, Printers, Scanners, CCTV. In fact, it will work on any device with a USB port!

This makes it perfect for corporate and government deployment.

If the user forgets their PIN, the drive can be unlocked by the admin PIN - the admin can then allow the user to set a new PIN.

Brute force hack defence mechanism

The datAshur PRO+A is intelligently programmed to protect against all forms of brute force attacks. If the user PIN is entered incorrectly 10 consecutive times then the user PIN will be deleted. All your data will remain on the device but now you can only access it by entering the admin PIN.

However, if you enter the admin PIN incorrectly 10 consecutive times, the PIN, encryption key, and data will be lost forever.

The device will revert to factory default settings and will need to be formatted before use.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
