Affordable TV Trolley that lets You Roll Your Display where You Want

Bring the TV to you. When it needs to be somewhere else, move it there with ease. The Manhattan Aluminum Height-Adjustable Multimedia TV Cart puts the TV on wheels so you can take it to different spaces as needed, avoid an annoying glare, or overcome a restrictive furniture setup. VESA-compliant and constructed of quality aluminum materials, this well-made, rolling TV stand supports large TVs up to 100" and can support a total weight up to 80 kg (176 lbs.). This rolling TV cart has all the benefits of the above-the-floor wall-mount installation - elevated views, a more professional look, greater security for your TV, etc. - plus mobile flexibility and independence. It includes one large AV shelf to hold and connect a laptop, Blu-ray player or streaming device, and it includes a camera shelf for easy video conferencing. The locking heavy-duty steel casters let you swiftly move this TV cart between rooms. Their highly durable polyurethane tread easily absorbs bumps on the way. This rolling TV stand is ideal for residential, office, hospitality, classroom and conference room, and other commercial purposes. The optional height adjustment lets you put the display at the right level for your audience, so your message is seen and received.
