

COUGAR Midi Tower Case, FV270 ARGB, Black

Model: CGR-58M6B-RGB

Manufacturer: COUGAR

EAN: 4710483777424

Product Code: 1704145

R4,732

Through A Glass Brightly

There is no mystery without illumination; no function without form.
The prism-inspired, polyhedral perimeter of the FV270 RGB mid-tower formed from tempered curved glass provides an unrivaled panoramic interior view of your build in full glory, while innovative angled cooling fan placements revolutionize airflow dynamics.
Facilitating backwards cable management and future-proofed for extreme builds with capacity to spare for bleeding-edge motherboards and GPUs, the FV270 RGB is anything but another brick in the wall.

Breathe

Harmonizing form with function, the FV270 RGB’s polyhedral design sets a new standard for airflow dynamics. Placing cooling fans on angled faces ensure uninterrupted, focused streams and the lifted front accesses an additional axis of ventilation, allowing air intake from below.

Angled Cooling Fan Placements Focus Airflow in Uninterrupted, Continuous Streams.

Prism of Light

The FV270 RGB offers an unparalleled panoramic view of the interior with a tempered, curved glass perimeter. Unlike rectangular cases, this prism-inspired design eliminates obstructive straight edges and vastly increases transparency, amplifying both visibility and lighting brilliance.

Light. Speed.
The FV270 RGB features an integrated universal fan hub that enables seamless coordination of PWM fan speed and RGB lighting. This allows you to control the RGB lighting without the need for software, or synchronize it with motherboard software.

Outside the Wall

Support for reverse cable management conceals cable clutter behind the reverse side of the motherboard, covered by a solid side of the FV270. The clean exterior lets your components shine without distraction – literally.

Tomorrow, Today

With broad compatibility for bleeding-edge E-ATX motherboards and accommodating GPUs of up to 420mm with rotatable brackets for horizontal/vertical orientation options, the FV270 RGB is engineered for the gaming rigs of the future. Create without limit, build without constraints, and stay ready for the next gen of tech.
