Dreame Air Styler

Is your beauty arsenal taking up too much space in the bathroom? Choose the Dreame solution! The Air Styler has 5 functions—use it to quickly dry your hair, create curls or waves, smooth out unruly strands, add volume to your hairstyle, and tame stray strands. The device features 3 temperature settings and 3 airflow settings. Swapping out the attachments and nozzle is quick and easy, and styling with air enhances the natural look of the final result—you'll see for yourself. In addition, the temperature monitoring system ensures safe use.

Prepare Your Hair for Styling

The Dreame device features a powerful motor that reaches speeds of up to 100,000 RPM. This allows you to dry your hair quickly yet gently, preparing it for further styling. The Air Styler doesn’t damage the delicate structure of your hair or expose it to excessively high temperatures, ensuring effective results and allowing you to enjoy impeccably healthy hair.

A New Day, a New You

Say goodbye to routine and surprise others every day with a new hairstyle. The accessories included in the set let you use the Dreame device in many different ways. The Air Styler lets you create waves and curls that add a feminine touch to your look. The dedicated attachment also helps you achieve perfectly straight, smooth hair—say goodbye to frizz! The product also helps add volume from root to tip, while ensuring stunning softness. But that’s not all—you’ll also enjoy a shiny finish, and the problem of unruly strands will be a thing of the past.

Innovative airflow system

The airflow system used by the Air Styler maintains an optimal distance between the device and individual strands of hair. The device effectively draws in and holds the hair, allowing you to precisely and effortlessly style your dream hairstyle, which will last all day.

A Variety of Settings

Don’t limit yourself when exploring the capabilities of the Dreame device. The Air Styler offers several temperature levels, such as Low, Medium, and High. There’s also a Cool Shot function, which you can activate by holding down the dedicated button for one second. You can also choose from 3 airflow speed settings (40 m/s, 50 m/s, 60 m/s). Additionally, the power button lets you easily start and pause drying and styling.

Caring for Your Hair

With Dreame, you don’t have to worry about potential hair damage. The NTC sensor measures the temperature up to 200 times per second, eliminating the risk of overheating and damage to both the hair’s structure and the device itself. As a result, the Air Styler allows for safe drying and long-lasting styling.
