

# Dreame X50 Ultra Cleaning Robot (Black)

Model: RLX85CE-6

Manufacturer: DREAME

EAN: 6977328065032

Product Code: 1706371

## R14,345

### Dreame X50 Ultra Cleaning Robot (black)

The Dreame X50 Ultra is a modern cleaning robot that makes everyday cleaning easier than ever. Thanks to the ProLeap™ system, the device easily overcomes obstacles, and its 20,000 Pa suction power effectively removes even deeply embedded dirt. VersaLift Navigation allows for thorough cleaning under low furniture, and HyperStream™ DuoBrush brushes are perfect for hair and pet hair. The PowerDock™ 8-in-1 station minimizes the need for manual operation, and the long runtime (up to 207 minutes) allows for thorough cleaning of the entire apartment. Operating the robot is extremely intuitive with the app, voice assistants, and Matter protocol support.

### Vormax™ – the suction power you need

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The robot is equipped with a sixth-generation TurboForce motor that reaches speeds of up to 90,000 RPM and uses Vormax™ technology to deliver suction power of up to 20,000 Pa. This allows the Dreame X50 Ultra to effectively remove dust, allergens, and stubborn dirt. OmniDirt™ Detection 2.0 technology recognizes different types of debris—dry, wet, mixed, and larger particles—automatically adjusting the cleaning strategy for optimal results.

## Adaptation to different surfaces

TripleUp Tech intelligently manages the robot's operation on different types of surfaces. When vacuuming, the side and main brushes lower and the mop remains raised to prevent carpets from getting wet. In mopping mode, the robot raises the brushes to a height of 10 mm to avoid re-soiling the already cleaned floor.

## Smooth obstacle crossing

The advanced ProLeap™ system, together with the retractable leg mechanism, allows the Dreame X50 Ultra to easily cross two-step thresholds with a total height of up to 6 cm, provided that the distance between the steps exceeds 4 cm. For single-step thresholds, the maximum obstacle height is 4.2 cm. This allows the Dreame X50 Ultra to move around the entire apartment with ease, without the risk of getting stuck. The built-in shock absorption system reduces vibrations, ensuring quiet and efficient operation. The robot offers two obstacle-clearing modes – synchronized and sequential – which allow you to adapt its operation to different home conditions.

## Cleaning hard-to-reach places

VersaLift Navigation uses advanced DToF and RGB sensors to enable precise cleaning under low furniture. The robot scans the room in 3D, recognizes up to 200 objects, and dynamically adjusts the height of the chassis. AI algorithms analyze the layout of the apartment for maximum cleaning efficiency. In addition, MopExtend™ RoboSwing technology makes it easy to reach edges and corners, and a 10 mm floating side brush prevents dirt from being transferred and carpets from getting wet.

## Hassle-free hair and pet hair removal

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
itworkup.co.za | sales@itworkup.co.za | +27 (11)541-9950

HyperStream™ Detangling DuoBrush is a system of dual brushes rotating in opposite directions, effectively removing dirt and tangled hair. Thanks to the combination of a rubber brush and bristles, the robot thoroughly cleans both carpets and hard floors. Automatic speed adjustment (1000 RPM on hard floors and 1200 RPM on carpets) increases cleaning efficiency, making the X50 Ultra the ideal choice for pet owners.

## Pet-friendly cleaning features

The Pet Zone Cleaning Customization 2.0 feature allows you to identify and thoroughly clean areas near pet beds, bowls, and litter boxes. In the app, you can set the robot to skip these areas or clean them more often. Dynamic Spot Cleaning mode automatically detects the presence of pets and people, saving the skipped areas in the DreameHome app to return to them later. The robot also allows you to quickly locate your pet and take a photo, and the Remote Pet Monitoring feature enables two-way communication. In addition, Large Particles Boost Mode 2.0 uses an AI camera and sound analysis to identify spilled food or litter and adjusts the suction power and brush speed for thorough cleaning.

## 8-in-1 automatic docking station

The PowerDock™ station acts as the robot's service center, performing 8 automatic processes. The dust container is emptied without user intervention, and the 3.2-liter bag lasts up to 100 days of use. The water refill system ensures uninterrupted mopping readiness, and the hot air mop cleaning function eliminates bacteria and unpleasant odors. The station is also responsible for charging the robot, refilling detergent, and drying mops, ensuring fully automated cleaning.

## Automated mop washing

The robot analyzes the degree of water contamination and automatically adjusts the amount of water, choosing from 32 cleaning levels. In areas with more dirt, the mop is washed more often, which translates into better results and resource savings.

## Hygienic cleaning and air filtration

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
itworkup.co.za | sales@itworkup.co.za | +27 (11)541-9950

The Dreame X50 Ultra is equipped with an EPA (E11) filter that eliminates up to 99.9% of bacteria when mopping and emptying the dust tank. It is the perfect solution for allergy sufferers and families with small children, ensuring a cleaner and healthier environment at home.

## Voice control and Matter protocol support

The robot works with the DreameHome app and popular voice assistants such as Alexa, Siri, and Google Assistant, allowing you to control it with voice commands. Intelligent sound recognition allows you to clean the area around you without having to manually set the zone in the app. Matter protocol support ensures full integration with your smart home system, guaranteeing seamless operation with other smart devices.

## Included

- X50 Ultra robot vacuum cleaner x1
- PowerDock docking station x1
- Main brush (installed) x1
- Brush guard (installed) x1
- Side brush (installed) x1
- Limescale inhibitor (installed) x1
- Dust container with filter (installed) x1
- Mop pad case x2
- Mop pad x2
- Dust bag (one installed) x2
- Cleaning tool x1
- Cleaning solution 200 ml x1
- Power cord x1
- PowerDock ramp extension x1
- Quick start guide x1
- User manual x1
