Dreame Aqua10 Ultra Roller Complete 0.23 L Black

Model: RLH71DE-1-BL

Manufacturer: DREAME

EAN: 6978515254666

Product Code: 1706383

R18,429

Aqua10 Ultra Roller

Rolls. Rises. Renews

The world's first AquaRoll™ robot vacuum and mop delivers adaptive cleaning for the whole home

Meet Aqua10 Ultra Roller, the world's first AquaRoll™ mopping robot vacuum redefining whole-home cleaning. Rise above limitations with adaptive floor mastery, self-sustaining freshness, and boundary-free navigation. Transform stubborn debris into spotless freedom—effortlessly.

Introducing Dreame's AquaRoll™ Mopping Technology

The roller mop is continuously cleaned and refreshed as it mops, which allows grease and the toughest stains to be completely and quickly washed off, so debris isn't spread across floors. This always-clean roller leaves floors gleaming and truly clean—unlike dated mops.

Ever-Fresh Water Ever-Clean Floors

Unlike dated mops that spread filth, Dreame's AquaRoll™ tech rinses the roller mop as it cleans, maintaining mop hygiene and water freshness in real time. This helps keep odors at bay and cleans with way more power.

Real-Time Fresh Water Mopping

Step 1:
Real-Time Spray with Fresh Water
12-Nozzle Precision Spray Ensures Consistent Wetness

Extended 260mm Roller Length Boosts Cleaning Coverage

32 Levels Wetness Control

Step 2:
Scrubs & Mops with High-Speed Roller
9-11N Smart Downforce Adapts Intelligently to Various Surfaces

Step 3:
Squeezes Out Dirty Water
Reinforced Scraping System Delivers Optimal Waste Purge

Step 4:
Continuous Water Refresh
High-Pressure Pump Sucks Dirty Water and Dispenses Fresh Water Continuously

Fluffy, but Never Fluffs on the Job

The industry's first FluffRoll™ Tech is engineered with dense fibers, enabling the roller mop to penetrate floor cracks and clean dried-on stains more effectively.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

It has a fluffing roller module which spins in the opposite direction with a high-speed motor while fluffing, loosening the mop pad as it contacts the floor.

Carpets? Covered

Dreame's AutoSeal™ roller guard is precision-engineered to prevent dampness and odors by proactively sealing the roller when carpets are detected. Truly intelligent protection that evolves with your home.

A Hot Self-Care Routine

The vacuum gives itself a 'hot bath' after cleanup via its 100℃* ThermoHub™ roller self-cleaning technology, rotating forward and backward in the base station, removing heavy stains, and neutralizing odors attached to the roller mop.Hot but Won't Hurt After the 100℃ self-cleaning routine, the washboard's PTC system temperature drops to a safe temperature that ensures safety for the entire family.

FlexRise™ Air Suspension: All-Terrain Control for Your Home

The ProLeap™ system smoothly overcomes obstacles up to 8 cm, the highest on the market. It cleverly raises its retractable legs, making it easy to overcome various obstacles without damage or accidents.

3cm Carpet Climbing

Triple-Wheel AgiLift™ chassis smartly clears carpets with ease via adaptive lifting, utilizing a three-wheel system that tailors strategies for various obstacles.

Keep Brushes Dry

While mopping, TripleUp Tech raises both the side and main brushes up to 10mm and 5mm respectively, allowing the mops to lower and tackle stubborn stains like soy sauce and coffee. This keeps the brushes dry and prevents unpleasant odors in the dust box, ensuring your vacuum

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. performs at its best and stays fresh.

Protects Your Carpets

When vacuuming, TripleUp Tech lowers the main brush to capture debris while raising side brushes by 10mm and the mop roller by 14mm. This prevents particle scattering and ensures powerful suction across carpets and hard floors, keeping all surfaces dry and protected.

Clear Vision for a Visible Clean

The OmniSight™ system 2.0 achieves precise navigation and obstacle avoidance via two 160° wide-angle, high-resolution 3D human-eye-inspired cameras, while integrating a 360° retractable LDS sensor to deliver an all-in-one solution for mapping, localization, navigation, and obstacle avoidance.

VersaLift™ Navigation360° Smart Mapping & Low-Profile Cleaning

360° Scanning

Aqua10 Ultra Roller's LDS system leverages 360° scanning to craft a detailed, blind spot-free map for precise navigation—eliminating unnecessary spinning for smarter spatial awareness.

Low-Profile Cleaning

When the retractable LDS sensor lowers, its height drops to 98mm—facilitating navigation under low furniture that traps other robot vacuums. Outfitted with binocular cameras and fill lights, it masterfully cleans narrow spaces, ensuring precise obstacle avoidance even in low-light environments.

Upgraded AstroVision™: NVIDIA-Powered Obstacle Intelligence via RL Training

Similar to how human eyes perceive the environment, two HD AI cameras capture depth info and form 3D details, easily avoiding over 240 objects with a precision level down to 1mm.Revolutionized by NVIDIA Isaac Sim & continuous reinforcement learning training, AstroVision™ now delivers ultra-precise dynamic obstacle avoidance. Experience optimized navigation efficiency in high-interference and ever-changing environments.

Active Pet Avoidance

dodging wandering pets, shifted bowls/toys

Play Zone Navigation

avoiding dropped toys, surprise clutter

Chaos-Proof Routing

maneuvering through dense furniture/objects

Taking Cleaning to the Edge

The robot vacuum's StereoEdge™ obstacle avoidance technology uses the 3D structured light to easily navigate around unfolded cables and irregularly shaped furniture, employing laser point cloud data to identify obstacles up to 10cm* away, reducing blind spots.

Reach Every Side

The detangling SideReach™ tech allows the robot vacuum to delve into tight spots and corners, sweeping out dirt in those areas. Its bristled brush keeps tangles at bay, while impressively tackling messes under furniture legs—leaving no mess behind.

Extended Cleaning

The roller mop hangs on two support rods over a slider. As the slider moves 40mm* to the right, the rods slide down, allowing the roller to thoroughly clean the edges.
