

# Dreame X60 Ultra Complete Cleaning Robot (Black)

Model: RLX87DE

Manufacturer: DREAME

EAN: 6978515258961

Product Code: 1706391

## R23,160

### Dreame X60 Ultra Complete Cleaning Robot (Black)

The Dreame X60 Ultra Complete is a cleaning robot that will allow you to forget about vacuuming and mopping your floors for a long time. It combines an ultra-slim 7.95 cm design, advanced navigation, 35,000 Pa Vormax™ suction power, active dirt detection, and a docking station that makes cleaning almost completely automated. Its impressive performance and smart solutions make it ideal for busy people, families with children, homes with pets, and more.

### Cleans every nook and cranny

Thanks to the VersaLift Navigation system, the robot automatically changes the way it perceives its surroundings depending on where it is working. In open spaces, it uses a raised DToF sensor that scans the room in 360° and provides fast, accurate mapping. However, when entering under low furniture, the sensor is completely hidden and the device switches to dual cameras (supported by AI

and a projector) with LED lighting, which create a three-dimensional image of the space. This allows the X60 Ultra Complete to perform better in low light, without losing its orientation, slowing down, or guessing the route, but instead thoroughly cleaning areas usually overlooked by other robots – such as under cabinets or sofas. The slim design of the device is also important. When the sensor is retracted, its height is only 7.95 cm, allowing it to clean freely in tight corners.

## OmniSight™ system – a robot that sees and understands space

The AI-powered OmniSight™ system uses two 120° wide-angle cameras that analyze images in a manner similar to human vision. The robot recognizes over 280 types of objects, including very small items as small as 1 cm in height, such as cables, blocks, and plastic bags. Importantly, the X60 Ultra Complete not only avoids them, but also decides how close it can clean, striking the perfect balance between efficiency and safety. The route planning algorithm, inspired by autonomous driving solutions, reacts in about 0.1 seconds, speeding up navigation by up to 200% and eliminating unnecessary stops. In addition, the robot is equipped with an LED light that makes it easier to detect dirt and move around in poorly lit areas.

## Active dirt detection

The X60 Ultra Complete offers an advanced Proactive Light Dirt Detection system that uses active lighting and IR sensors to detect dirt. It effectively distinguishes between solid particles, hair, fur, and light-colored liquids that are usually invisible to standard cameras. What's more, the robot not only recognizes dirt, but also analyzes its nature and automatically adjusts its operation accordingly. It selects the mode, repeats mopping until stubborn stains are cleaned, and when it encounters pet hair, it increases suction power and reduces the speed of the side brush. This prevents it from smearing wet dirt and transferring dirt to other rooms in the house.

## ProLeap™ and AgiLift™ – trouble-free obstacle avoidance

Don't worry about the robot getting stuck somewhere or getting stuck on a threshold. The ProLeap™ system uses extendable legs and arms, choosing one of two strategies for overcoming obstacles. This allows the X60 Ultra Complete to easily overcome single steps up to 4.5 cm high or double steps up to 8.8 cm (4.5 + 4.3 cm). In addition, the AgiLift™ chassis with three wheels allows the robot to safely drive onto carpets.

## Fast and efficient vacuuming – Vormax™ system and suction power up to 35,000 Pa

The Vormax™ suction system with a power of up to 35,000 Pa is responsible for the effective removal of both fine dust and larger debris such as gravel, crumbs, hair, and food debris. Such high performance allows for the thorough removal of debris even from floor crevices, grout lines, and deeper layers of carpets.

## Improved brushes resistant to hair tangling

The HyperStream™ Detangling DuoBrush 2.0 dual brush system is responsible for effective debris collection. The rollers rotate at speeds of up to 1,600 rpm, and the 60% thicker rubber elements effectively direct debris towards the suction inlet. This means you can forget about tangled hair and tedious manual cleaning! In addition, the extendable pressure chamber creates a semi-enclosed space that enhances suction power at the floor surface. In practice, this means zero tangles even with hair up to 40 cm long and stable performance.

## Extendable cleaning elements – cleanliness in every corner

The Dreame X60 Ultra Complete uses Dual Flex Arm Technology, which physically increases the cleaning range. The extendable side brush allows for thorough cleaning in corners and around furniture legs, while the MopExtend™ RoboSwing system allows the mop pads to reach up to 4 cm beyond the robot's outline. This ensures that every nook and cranny will shine with cleanliness!

## Advanced mopping and TripleUp Tech

The DreameGlide™ cleaning system allows for quick and thorough floor cleaning. The thermal mop pads can maintain a temperature of up to 40°C and rotate at speeds of up to 230 rpm, exerting pressure of up to 15 N and automatically swinging up and down within a range of 10° (±5°) to perfectly adapt to uneven surfaces. The result is effective scrubbing and thorough removal of even greasy stains. What's more, during mopping, the robot's brushes lift up (the side brush up to 10 mm and the main brush roller up to 5 mm), and the mop pads work independently, eliminating the risk of moisture entering the dust container and causing unpleasant odors. This solution also prevents the freshly cleaned floor from getting dirty again. When vacuuming, the situation is reversed – the pads

rise (up to 10.5 mm) and the brushes drop. This keeps carpets dry and perfectly clean!

## All-in-One PowerDock – long weeks of autonomous cleaning

Forget about the need for manual maintenance of the robot. The All-in-One PowerDock station will do everything for you, washing the mop pads with water at a temperature of up to 100°C, drying them with hot air, and automatically emptying the dust container into a spacious bag that lasts up to 100 days without replacement. Fast charging (in about 80 minutes) and dispensing of two different cleaning agents are also possible. One neutralizes pet odors, while the other is responsible for daily floor care. In addition, an optional water connection kit (sold separately) completely eliminates the need to manually refill water and empty tanks.

## Smart operation on carpets

When vacuuming on carpet, the robot's mop pads rise to a height of up to 10.5 mm and the side brush to 10 mm, keeping fabrics dry and safe. At the same time, the device increases its suction power for intensive but controlled cleaning. In the app, you can also set the Intensive Carpet Cleaning mode and decide whether carpets should be cleaned first. In addition, you can specify the type of carpet in a given zone – the system can disconnect the mops for long-pile carpets, raise them to a height of 21.5 mm on short-pile carpets, and recognize fringed carpets and clean them from the appropriate side or avoid them altogether, eliminating the risk of pulling in the material.

## Pet Care 4.0 – something special for pet owners

Pet Care 4.0 mode makes the Dreame X60 Ultra Complete perfect for homes with pets. The robot recognizes pets, avoids them while working, identifies their activity zones, and can automatically make additional passes where hair accumulates. It can also detect larger debris, such as food or litter, adjusting its driving pattern and suction power accordingly. It is also possible to specify how the X60 Ultra Complete should behave near bowls or litter boxes. In addition, a video call option is available, so you can check on your pet at any time, calm it down if it gets scared, and even take a photo or generate a short vlog starring your pet. You don't have to worry about privacy – TÜV SÜD certification confirms that images and videos recorded by the robot are not uploaded to the cloud and are encrypted in accordance with the ETSI EN 303 645 standard.

## Various control options – voice commands, app, and Matter compatibility

The robot is compatible with the Matter standard, enabling quick and easy integration with your smart home. An app is also available, allowing you to conveniently change settings, enable the carpet avoidance function, manage maps, and much more. You also have a built-in voice assistant with over 40 commands (activated in the app), and you can control it with your voice via Amazon Alexa, Google Home, or Siri. Control the robot or check its status using your smartwatch, speaker, or other devices. Just a few words are enough to get it cleaning – you don't even have to reach for your phone!

## Included

- Cleaning robot
- Base station
- Main brush (pre-installed)
- Brush cover (pre-installed)
- Side brush (pre-installed)
- Dust container (pre-installed)
- Dust container filter (pre-installed)
- Mop pad (pre-installed) x2
- Mop pad holder x2
- Dust bag x2 (1x pre-installed, 1x spare)
- Automatic detergent dispenser module – double detergent compartment (factory-installed)
- AWH15 pet odor neutralizing detergent (200 ml) x2
- Washing plate filter (factory installed)
- Base station ramp extension
- Quick start guide
- User manual
- Accessory kit (main brush, side brush, 2x dust container filter, 2x dust bag, 3x pair of mop pads, AWH7 cleaning agent (1 l)
