Dreame F20 Plus Cleaning Robot (White)

The Dreame F20 Plus is a cleaning robot that will take care of your daily cleaning needs. Automatic dustbin emptying means you can forget about manual cleaning for weeks at a time, while powerful suction effectively removes dust, crumbs, and pet hair from any surface. Intelligent navigation ensures thorough cleaning of the entire apartment, reaching even corners and edges, while the hair tangling prevention system guarantees smooth, trouble-free operation. The simultaneous vacuuming and mopping function allows you to refresh your floors in a single cycle, while the long operating time and app or voice control make cleaning convenient and quick.

Automatic emptying

The automatic dust collection system with a large 4-liter bag eliminates the need for manual emptying of the container. The robot empties the container itself after cleaning, limiting contact with dust and allergens. This feature allows the robot to go up to 100 days without manual emptying of

the dust container. This saves a lot of time and significantly improves hygiene in everyday use.

20,000 Pa Vormax™ power – no compromise on cleanliness

The Dreame F20 Plus is equipped with an advanced Vormax™ suction system with a power of up to 20,000 Pa, which effectively removes both fine dust and larger debris or pet hair. The powerful motor and optimized design allow for very high efficiency in collecting large particles. Five adjustable power levels allow you to precisely adjust the robot's performance to the type of floor and degree of dirt, ensuring the perfect balance between efficiency and quiet operation.

Thorough cleaning of edges and corners

The upgraded side brush with 6.8 mm longer bristles significantly increases the cleaning range along walls and in corners. As a result, the robot achieves up to 95% edge coverage, eliminating areas that are usually overlooked during standard cleaning. Effective removal of hair and dust from hard-to-reach areas helps reduce the accumulation of dirt, thereby reducing sources of unpleasant odors and improving overall hygiene in the home.

Zero tangles, smooth operation

The advanced Dual Anti-Tangle system was designed for homes where hair and pet hair are a problem. The specially designed main brush with a combination of rubber and bristles and a serrated structure effectively collects hair and prevents it from winding around, maintaining full suction power. The side brush works without the risk of tangling, which translates into smooth, hassle-free cleaning and less need for manual maintenance.

Vacuuming and mopping in one cycle

The Dreame F20 Plus is a practical, multi-tasking solution that vacuums and mops floors at the same time. Dust, crumbs, and pet hair are effectively sucked up, while hard surfaces are wet-wiped, removing everyday dirt and stains without the need for re-cleaning. Precise 32-step water flow control allows you to adjust the mopping intensity to the type of floor, while the 280 ml water tank and 220 ml dust container ensure stable and efficient operation.

A smart approach to carpets and cleaning routes

The robot automatically recognizes carpets and adjusts its cleaning strategy accordingly, increasing suction power where needed. The Smart Path Finder technology is responsible for precise space mapping and intelligent cleaning route planning, which translates into effective coverage of the entire surface without unnecessary repetition. Interactive maps make it easy to control the process and allow you to fully utilize the device's potential.

Full control in the app and 3D maps

With the dedicated app, you get access to advanced cleaning management features. The ability to create 3D maps, support for multiple floors, setting no-mop zones, and precise cleaning according to the layout of the rooms allow you to perfectly tailor the robot's work to your individual needs. The whole thing works intuitively and gives you full control over every cleaning cycle, even when you are not at home.

Long operating time

The built-in 3200 mAh battery allows for up to 150 minutes of continuous operation in quiet mode, including simultaneous vacuuming and mopping. This operating time allows you to easily clean large apartments and single-family homes in one cycle without the need for frequent recharging.

Voice control and even more convenience

The Dreame F20 Plus integrates seamlessly with popular voice assistants such as Alexa, Siri, Google Assistant, Alice, and Marusia. This allows you to start or control cleaning with simple voice commands, without reaching for your phone. This solution fits perfectly into a smart home and further simplifies everyday tasks.

Included in the set

- cleaning robot
- base station
- main brush (installed)
