Dreame FP10 Hava Temizleyici

Model: CVF16A

Manufacturer: DREAME

EAN: 6978515252464

Product Code: 1706399

R8,838

Dreame Furcatch FP10 Air Purifier

The Dreame Furcatch FP10 purifier was designed for homes where air purity is particularly important, especially those with pets. It uses an innovative self-cleaning roller system and LoopBoost™ flow technology, which increases the efficiency of capturing pollutants. The device achieves a purification efficiency of PCADR 350 m³/h and can capture pet hair with an efficiency of up to 99.9%, while offering quiet operation in the range of 32 to 62 dB. With a 6-stage filtration system, intelligent control, and minimalist design, the purifier ensures long-lasting, stable performance and high comfort of use.

Self-cleaning roller – effective collection of pet hair and dust

The FP10 model features an innovative 360° self-cleaning roller system that automatically collects and detangles pet hair. This solution captures up to 99.5% of hair and prevents clogging of the pre-filter, reducing the need for manual maintenance of the device. Smart sensors adjust the cleaning frequency to the current level of contamination, allowing the purifier to maintain high performance

for a long time.

LoopBoost™ – more effective capture of contaminants

Effective air circulation is ensured by the patented LoopBoost™ flow system, which increases hair capture efficiency by up to 22 times compared to traditional inlet designs. This technology improves overall filtration efficiency by 19% and quickly removes airborne contaminants such as pet dander, dust, and other small particles.

CataFresh™ – effective odor neutralization

The specially developed CataFresh™ system effectively removes unpleasant odors that can occur in homes with pets. It uses 2.5 times stronger porous activated carbon to trap odor molecules. These are then chemically broken down by a metal layer. This combination keeps the air fresh and neutralizes unpleasant odors directly during the filtration process.

Multi-stage air purification

The Dreame FP10 uses a multi-layer filtration system designed to effectively remove various types of pollutants. The pre-filter traps larger debris such as hair and dust, while the H14 HEPA filter captures fine particles, allergens, and bacteria. The purification process is also supported by a CataFresh™ layer that eliminates odors. Added to this is UVC technology and negative ions, which ensure even more thorough purification of the air in the room.

Sealed dust container

The Dreame FP10 purifier is equipped with a sealed container that limits the spread of odors and dust during use. The design inhibits the growth of bacteria, helping to maintain hygiene inside the device, and the transparent window allows you to quickly check the fill level. The container also has a large capacity of 460 ml, which means it does not need to be cleaned too often.

Refined in every detail

The Dreame FP10 purifier stands out with its modern design that combines aesthetics with functionality. It is equipped with ring lighting that changes color depending on the air quality, allowing you to assess the current conditions in the room at a glance. The backlighting means that the device can also serve as a night light in a child's room or bedroom. What's more, an optional pet weighing base is available for separate purchase, allowing you to monitor your pet's weight and save the data in the app.

Convenient operation

The purifier is compatible with the Dreamehome app, which allows you to control it remotely. You will also find information and reports on the air quality in your home. The FP10 model is also equipped with easy-to-use buttons that allow you to adjust the fan speed, select the operating mode, activate the child lock, set the backlight brightness, or display the current air quality.

Included

- Air purifier
- Power adapter
- User manual

Model	Dreame Furcatch Air Purifier FP10
Noise level	32-62 dB(A)
Power	45 W
Filter	HEPA H14
Filter life	2 years
Features	Self-cleaning roller, LoopBoost™ airflow, CataFresh™ odor removal, remote control via app, air quality indicator light, child lock, operating modes (AUTO AI, Pet, Sleep, Custom)
CADR [cleaner efficiency per hour]	350 m3/h
Heating function	No
