Dreame AirStyle Pro HI (Pink)

The Dreame AirStyle Pro HI is a modern 8-in-1 hair dryer and curling iron that combines the functions of a hair dryer, curling iron, straightener, and styling brushes into one sleek device. Equipped with a brushless motor reaching up to 130,000 rpm, it generates an airflow of up to 70 m/s, allowing you to dry short hair in as little as 1 minute and long hair in about 5 minutes. A-Curl™ technology automatically wraps strands around the tip using a precisely directed airflow, making it easy to

create even curls and waves without complicated operation. The NTC sensor monitors the temperature 1,000 times per second, protecting hair from overheating, while the smart app offers ready-made styling routines tailored to your hair type. The set includes 8 attachments, an elegant case, and accessories that allow you to style straight, wavy, and curly hair.

One device for comprehensive hair styling

The Dreame AirStyle Pro HI replaces several separate devices, as it allows you to dry, straighten, smooth, curl, and add volume. Thanks to the interchangeable attachments, you can switch in a matter of moments from everyday drying to creating curls, straight styles, or enhancing your natural wave. This solution saves space and simplifies daily hair care. One device is enough to create both a quick everyday look and a more polished style for special occasions.

A-Curl™ Technology – Automatic Curls Using Air

A-Curl™ is an advanced airflow technology that automatically draws in and wraps strands around the styling tip. This makes creating curls easier and more consistent, even if you don’t have much experience with hair styling. Air and controlled temperature work together to give your hairstyle a lasting shape without having to manually wrap each strand. The result is neat waves and bouncy curls that look natural and polished.

Smart app for additional support

The DREAME mobile app is a practical complement to the set’s capabilities. After creating a hair profile, the user receives guidance on styling time, temperature, and the next steps. Pre-set routines help achieve specific effects, such as soft waves, curls, or straight hair. This is a convenient solution for those who want to use prompts and achieve consistent results faster.

130,000 RPM motor and fast drying

The high-performance brushless motor generates a powerful and steady airflow that effectively reduces drying time. An airspeed of up to 70 m/s quickly removes moisture from the hair while preparing it for further styling. This allows short hair to be dried in as little as about 1 minute, and long hair in about 5 minutes. The 1400 W power ensures efficient performance, which translates to

time savings during daily use.

Hair Protection and Device Durability

The NTC sensor monitors the temperature 1,000 times per second, maintaining stable styling conditions and reducing the risk of overheating the hair. There are three temperature settings to choose from—cool, warm, and hot—as well as a cool air function that helps set the hairstyle. The Dual Intake Filters system protects the motor from dust and fine particles. This solution ensures long-lasting and reliable performance even with regular use.

8 attachments for different hair types and styles

The set includes attachments that allow you to tailor your styling to your hair type and desired result. The soft smoothing brush gently detangles fine and sensitive hair, while the firm brush handles thicker strands better and helps lift hair at the roots. The round brush adds volume, the diffuser enhances natural curls, and the straightening nozzle makes it easy to achieve a smooth hairstyle. Two 32 mm Auto-Wrap attachments allow you to create symmetrical curls on both sides of the head.

Comfort and refined details

The device weighs approximately 290.6 g without the power cord, so it fits comfortably in your hand and doesn’t strain your wrist. The intuitive Quick-Swap locking system allows for quick and safe attachment changes. The 360° swivel cord reduces the risk of tangling and facilitates easy maneuvering during styling. The pink finish with a subtle texture and the elegant case make the device aesthetically pleasing and convenient to store.

Included

- Main unit with power cord
- Fast Dryer attachment
- Straightening nozzle
- Diffuser
- 32 mm curling barrel x 2
