

Dreame G12 Dual 5-in-1 stick vacuum Battery Dry&wet Bagless Black 24 Ah

Model: HHV24A

Manufacturer: DREAME

EAN: 6979181925980

Product Code: 1706401

R9,412

Dreame G12 Dual Cordless Upright Vacuum and Mop

Daily cleaning takes on a whole new dimension when a single device can effectively vacuum, mop, and reach places where most appliances often fall short. The G12 Dual is one of Dreame’s first ultra-slim 5-in-1 vacuums, combining the functions of an upright vacuum and a mop with a set of interchangeable attachments. With it, you can conveniently clean floors, carpets, upholstered furniture, curtains, car interiors, and hard-to-reach nooks and crannies. Its lightweight design allows it to operate completely flat, while its high suction power, intelligently designed brushes, and maneuverability features ensure that removing both dry and wet dirt is quick and comfortable. This versatile device is designed for homes where effectiveness, convenience, and time-saving matter

most.

One device, many uses

The Dreame G12 Dual is designed to replace several different cleaning devices. Thanks to its quick-change accessories, you can easily adapt it to the type of surface you’re cleaning—from hard floors and low-pile carpets, to sofas, beds, and curtains, all the way to the interior of your car. Whether you’re cleaning the living room, bedroom, kitchen, or hard-to-reach spots between furniture, the right attachment lets you effectively remove dust, crumbs, pet hair, and other debris. As a result, the Dreame G12 Dual successfully takes on the role of several specialized appliances.

Vacuuming and mopping at the same time—faster and more convenient

The main wet and dry vacuuming attachment allows you to pick up debris and wash the floor simultaneously in a single pass. Spilled drinks, mud, food scraps, and everyday dust disappear without the need for two separate steps. Unlike with a traditional mop, you don’t have to wait a long time for the floor to dry or manually clean the dirty mop head. Both floor cleaning and the device’s self-cleaning process are quick and virtually maintenance-free, making cleaning much more convenient.

A precision brush for every type of floor

The set includes an improved Multi-Surface Brush with LED lighting, designed for effective cleaning of both hard floors and low-pile carpets. An improved design with better sealing increases suction efficiency, allowing the device to pick up debris even more effectively. The brush features V-shaped bristles that reduce friction when gliding over carpets, ensuring smoother movement in both directions. A built-in comb continuously separates hair from the roller and directs it straight into the dustbin, significantly reducing the problem of hair tangling around the brush. Additionally, white LEDs effectively illuminate the floor, making it easier to spot fine dust and debris that are invisible under standard lighting.

Interchangeable attachments for thorough cleaning

The Dreame G12 Dual easily adapts to various tasks, thanks in part to its additional accessories. The motorized mini-brush effectively removes pet hair, dust, and fine debris from upholstered furniture, mattresses, and armchairs. The crevice tool allows you to thoroughly clean corners, crevices, and other hard-to-reach areas that a standard brush cannot reach. The soft dusting brush, on the other hand, works great for cleaning delicate and hard surfaces, such as desks, shelves, and computer keyboards, picking up scattered dust and fine debris without risking damage to the surfaces being cleaned.

It reaches places other vacuums can’t

Its lightweight and handy design, just 9.85 cm tall, combined with the ability to fully extend the unit to 180°, allows you to effortlessly vacuum under very low cabinets, sofas, or beds. When operating in a flat position, a special motor with a liquid separation system effectively separates dirty water, preventing it from flowing back and protecting the device’s main motor. As a result, the vacuum cleaner maintains high performance even when cleaning in the lowest spaces, with suction power reaching 28,000 Pa. The water tank, located at the base, lowers the device’s center of gravity, making it effortless to maneuver the vacuum cleaner.

Smart cleaning tailored to the level of dirt

The Dreame G12 Dual effectively removes dirt and can also recognize it and respond accordingly. The smart system detects both light dirt and tougher stains, then automatically adjusts the suction power to the current conditions. This allows the device to operate efficiently and use energy effectively, without the need to manually change settings. The current dirt level is displayed in real time on a clear LED screen, where three indicator lights show the degree of dirt on the surface being cleaned, allowing you to easily monitor cleaning progress.

A Clean Brush After Every Cleaning Session

The device’s high effectiveness is ensured by a brush-washing system that uses fresh water to continuously rinse the roller with every pass, minimizing contact with dirt. The TangleCut™ technology also ensures the brush stays clean by using a flexible scraper that constantly adheres to the roller. Its job is to separate tangled hair, which is then precisely cut by blades made of Swiss PPA plastic. Combined with the self-cleaning mechanism featuring bidirectional roller rotation, this

solution effectively eliminates the problem of tangled hair, ensuring the brush remains tangle-free and does not require manual cleaning.

Perfect cleanliness right up to the edges

Dust and dirt that accumulate along baseboards, under cabinets, or in corners often remain out of reach for standard vacuum cleaners. The Dreame G12 Dual features a full-width cleaning brush on both edges that hugs walls and furniture baseboards tightly. With the ability to clean from the front and on both sides, the device effectively reaches areas that usually require additional attention, leaving a uniformly clean surface without the need for re-vacuuming.

Self-cleaning at 95°C and quick drying with hot air

After cleaning is complete, the Dreame G12 Dual automatically maintains the hygiene of the roller. The automatic cleaning function uses water at 95°C, which effectively dissolves dirt and thoroughly cleans the brush without the need for manual scrubbing. This is followed by hot-air drying at the same temperature, which lasts about 5 minutes. This helps reduce unpleasant odors and bacterial growth while keeping the roller dry, fluffy, and ready for the next cleaning session.

Power That Keeps Up with Everyday Challenges

With suction power of up to 28,000 Pa and 90 AW, it effectively removes both larger debris and fine dust, dirt, and pet hair. The device handles cleaning carpets, hard floors, and hard-to-reach corners equally well, maintaining high performance on every surface. The high-capacity battery provides up to 60 minutes of runtime while simultaneously vacuuming and mopping floors, which is enough to clean an area of up to 350 m². In upright vacuum mode, runtime extends to 65 minutes, and the 780-ml clean water tank helps minimize the number of breaks needed to refill it.

Included in the set

- vacuum cleaner body
- handle
- motorized handle
- charging base
