R2,791

Lepro PG1-4 24W 1600lm Garden Light

The Lepro PG1-4 garden light, with a power of 24 W and a luminous flux of 1600 lm, lets you create striking lighting arrangements around your home, garden, and patio. With the option to choose from preset scenes or create your own settings, you can easily customize the lighting for any occasion. Its versatile mounting system and high weather resistance make this light ideal for year-round outdoor use.

Flexible installation tailored to your space

Its well-thought-out design allows for two installation methods. The lamp can be mounted directly on a wall as facade lighting or placed in the ground using a mounting spike. This makes it easy to direct the light exactly where it’s needed—highlighting plants, paths, fences, or garden architecture.

Colorful scenes for every occasion

The preset lighting scene selection feature and the ability to create your own settings let you tailor the look of your space to your current mood or event. The lamp allows you to create attractive color effects that can highlight a fence, patio, or relaxation area. It’s a simple way to create a unique atmosphere during garden gatherings or evening relaxation.

Resistant to rain and harsh conditions

The IP65 rating provides effective protection against water and adverse weather conditions. The lamp is designed for outdoor use and remains fully functional even during heavy rain. As a result, it can reliably illuminate your garden, building facade, or the area around your home all year round.
