DREAME T16 Pro Heat Upright Vacuum Cleaner with Mopping Function

Model: HHR58A

Manufacturer: DREAME

EAN: 6979932400674

Product Code: 1706406

R13,055

Dreame T16 Pro Heat Cordless Upright Vacuum Cleaner with Mopping Function

The Dreame T16 Pro Heat combines vacuuming and mopping functions to effectively remove both dry and wet debris. Its 30,000 Pa suction power, supported by ThermoRinse™ technology, helps effectively tackle various types of dirt, while the WhaleSweep™ AI robotic arm and a slim design just 9.85 cm tall make it easy to clean along edges, in corners, and under low furniture. The intelligent AutoAdapt™ system automatically adjusts operating parameters to the level of dirt, while the hair-resistant brush, self-cleaning function, mobile app, and runtime of up to 70 minutes enhance user convenience.

30,000 Pa – thorough removal of dry and wet debris

Its high performance is driven by a motor reaching speeds of up to 160,000 RPM, which generates 30,000 Pa of suction power. The vacuum cleaner easily picks up spilled pet food, pasta, eggs, hair, or pet hair, while simultaneously removing spilled liquids. This means you don’t have to vacuum first and then mop—the device performs both tasks simultaneously, reducing cleaning time and letting you enjoy a clean floor faster.

No More Greasy Stains

The ThermoRinse™ system uses water heated to 90°C to continuously rinse the brush during operation. This solution helps remove greasy dirt more effectively and reduces grease buildup on the brush roll, allowing the brush to maintain high cleaning performance for longer and effectively remove stains left by butter, oil, cream, or sauces—which are common in kitchens and dining rooms.

WhaleSweep™ – Clean Edges and Corners

Thanks to the WhaleSweep™ AI Robotic Arm, the vacuum cleaner more effectively picks up larger debris from corners and along edges. The improved arm extends 17 mm higher, making it easier to pick up larger food scraps and other debris stuck along baseboards or in hard-to-reach areas. Combined with powerful suction, the device leaves fewer residues behind after cleaning.

Easy Access Under Low Furniture

The vacuum can be laid completely flat at a 180° angle, and its slim 9.85 cm profile makes it easy to clean under beds, sofas, and cabinets without having to move them. This makes it easier to reach areas where dust, pet hair, and other debris accumulate.

AutoAdapt™ Smart Cleaning

Precise cleaning is ensured by a high-accuracy multispectral sensor that detects the level of dirt and works in conjunction with the AutoAdapt™ system. The vacuum adjusts suction power as well as the amount of water and cleaning solution used, ensuring it uses exactly the right amount of resources.

Say Goodbye to Hair on the Brush

The Dual-Scraper system uses two scrapers to keep the roller clean while in operation. TangleCut™ 2.0 effectively reduces hair tangling, ensuring smooth brush operation, while the flat, flexible scraper helps remove excess water and minimizes streaking on the floor. As a result, both the brush and the cleaned surface stay cleaner, and daily maintenance of the device is simpler.

Always Ready to Clean

Once cleaning is complete, simply run the automatic cleaning program. The vacuum cleaner uses water at 95°C to thoroughly wash the roller, then dries it with hot air at the same temperature. This solution helps remove dirt from the roller, keeps the device’s components fresh, and reduces the need for manual cleaning after each use.

Customize Settings via the App

The app provides convenient access to the vacuum cleaner’s settings. It lets you create personalized cleaning routines, reminds you when to replace consumable parts, and allows you to install OTA updates.

Up to 70 minutes of runtime

The battery, with a total capacity of 5000 mAh, allows for up to 70 minutes of runtime in Eco mode, approximately 50 minutes in Smart mode, and up to 20 minutes in hot water cleaning mode. Combined with a 900-ml clean water tank, the device allows for convenient cleaning of larger apartments and homes without frequent breaks for recharging or refilling water. This makes it possible to comfortably clean multiple rooms in a single cleaning cycle.

Easy to maneuver throughout your home

The GlideWheel™ Power System makes it easier to guide the vacuum cleaner across the floor, requiring less effort to maneuver the device. While cleaning, it’s easier to navigate around furniture, change direction, and clean larger areas without putting excessive strain on your hands.

Included:

- Main unit
- Handle
- Charging station
- Cleaning brush
- Cleaning solution
- Spare roller
- Spare filter

Manufacturer	Dreame
Model	T16 Pro Heat
Suction power	30,000 Pa
Clean water tank capacity	900 ml
Dirty water tank capacity	500 ml
Operating time with mopping	Up to 70 minutes in Eco mode
Self-cleaning function	Yes
Battery capacity	5,000 mAh
Features	Dry and wet cleaning, ThermoRinse™ technology, 180° flat cleaning, WhaleSweep™ AI robotic arm, AutoAdapt™ smart dirt detection, brush self-cleaning at 95°C, hot air drying at 95°C, TangleCut™ 2.0 hair-tangle prevention system
Charging time	Approximately 4 hours

Gross weight: 11950, Net weight: 8200, Box length: 76,50, Box width: 34,50, Box height: 35,00, Wet cleaning : Yes, Operating time (min): do 70, GPSR Link: https://psr-assets.innpro.pl/small_appliances/sg_small_appliances_cleaning.pdf, PPWR: https://ppwr.innpro.pl/dreame, Suction power (Pa): 30 000, Samoczyszczenie gorącą wodą: Tak,
