UPERFECT M156J11 Delta Portable Dual-Screen Monitor with 15.6" Displays

The UPERFECT M156J11 Delta is a portable dual-screen monitor with a 15.6" diagonal, designed to expand your workspace without the need for additional desktop monitors. Two Full HD displays with a resolution of 1920 × 1080 allow you to comfortably work with multiple applications simultaneously, conduct video conferences, use spreadsheets and documents, and browse content without constantly switching between windows. The matte IPS panels offer wide viewing angles of 178°, ensuring the image remains clear regardless of the user’s position. The monitor is ideal for remote work, studying, business trips, and anywhere where mobility and the ability to quickly set up a workspace are important.

Simple connection via USB-C

The monitor allows you to transmit video and audio from a compatible laptop using a single USB-C cable that supports both audio and video data transmission. For the device to function properly, it must be connected to the included power adapter at the same time, in accordance with the manufacturer’s recommendations. Thanks to Plug & Play technology, there’s no need to install additional drivers, so the monitor is ready to use almost immediately after connection. Additionally, the mini HDMI port enhances compatibility with computers, game consoles, and other devices equipped with an HDMI output.

Two independent screens make everyday work easier

The dual-screen design allows you to comfortably use two screens at the same time, which streamlines your workflow and makes multitasking more comfortable. One screen can be used for online meetings or displaying documents, while the other can be dedicated to working with text, spreadsheets, presentations, programming, or viewing multimedia. This setup reduces the need to constantly switch between windows and allows you to make better use of your available workspace. It’s a practical choice for mobile workers, students, and home users.

IPS Panels with a Matte Finish and HDR Support

Both screens use Full HD IPS panels, which provide wide viewing angles and good image clarity during everyday use. With a brightness of 250 cd/m², a contrast ratio of 1000:1, and 88.9% sRGB color coverage, the monitor performs well for office work, browsing the web, or watching movies. The color depth is 6 bits (262,000 colors), so the model is designed primarily for everyday use rather than professional graphics or video editing. Support for HDR allows for the display of content optimized for contrast, while the matte finish effectively reduces glare.

The adjustable stand enhances user comfort

The monitor is equipped with a built-in, adjustable stand that allows the tilt angle to be set between 0 and 135°. This makes it easy to adjust the screen position to match the height of your desk and your personal preferences, improving ergonomics during long hours of work. The foldable design allows you to quickly prepare the device for transport and protects the screens during transport. The

sturdy housing, made from a combination of ABS plastic and metal, ensures adequate durability while maintaining the device’s portability.

A Travel-Ready, Portable Design

When folded, the monitor measures just 35.5 × 21.4 × 2.2 cm, so it fits easily into a laptop bag or backpack. When unfolded, its dimensions are 35.5 × 42.8 × 1.1 cm, offering a comfortable workspace with two 15.6-inch screens. Its slim design makes it easy to transport and allows you to set up a mobile workspace virtually anywhere. This solution works well at home, in the office, and on business trips.

Built-in Speakers and Energy-Efficient Operation

The M156J11 Delta model is equipped with two built-in speakers rated at 2 × 8 Ω / 1 W, allowing you to play audio without having to connect external speakers. The monitor is compatible with Windows 7, Windows 10, Windows 11, and macOS 11.5 and later, offering broad compatibility with modern computers. With a power consumption of just 13 W, it helps reduce energy usage during everyday use. Thanks to two full-function USB-C ports and a mini HDMI connector, the monitor can be easily connected to a wide variety of devices.

Included in the package

- UPERFECT M156J11 Delta 15.6" portable monitor
- USB-C to USB-C cable x 2
- Mini HDMI to HDMI cable
- Power adapter
- User manual
