Puluz Insta360 X5 Waterproof Case

Explore the underwater world and capture unique 360° shots with the Puluz PU1206T waterproof case! This accessory is compatible with the Insta360 X5 camera and is waterproof down to a depth of 50 meters, making it perfect for diving and snorkeling. Its special design allows you to record panoramic footage without the housing appearing in the frame, and the optical elements with an AR anti-reflective coating ensure light transmission of over 95%. Additionally, the durable housing protects the camera from impacts and drops, allowing you to use the equipment with confidence during water adventures and outdoor activities.

Unobstructed panoramic shots

Capture a full 360° perspective even when recording underwater. The Puluz housing uses a special optical design that compensates for light refraction in water, enabling seamless stitching of panoramic images without visible transitions or blind spots. As a result, the housing itself remains

invisible in your footage, and you can capture your entire surroundings in a single shot. High-quality optical elements with an AR coating reduce light reflections and ensure light transmission of over 95%, resulting in a clear image and natural color reproduction. This solution allows you to capture underwater landscapes and dynamic scenes with a high level of detail.

Waterproof Design and User-Friendly Operation

A precision sealing system allows you to safely submerge the camera to a depth of up to 50 meters, while a dual latch mechanism ensures the housing closes securely. Assembly takes about 10 seconds, so you can quickly get your gear ready for your next shoot. The shock-, impact-, and drop-resistant design provides additional protection for the camera during intense activities. The kit also includes 12 anti-fog inserts that reduce condensation on the optical elements during sudden temperature changes. The case measures 16.8 × 8.2 × 9.6 cm and weighs 249.5 g, making it easy to take along on your next adventures.

Included in the set
