Dehumidifier Dreame DD20

Model: CVF36A

Manufacturer: DREAME

EAN: 6978515258657

Product Code: 1706416

R4,978

Dreame DD20 Dehumidifier

Excess moisture doesn’t have to mean constantly monitoring indoor conditions and waiting a long time for your laundry to dry. The Dreame DD20 removes up to 20 liters of water from the air per day and is designed for spaces up to 40 m²; its humidity control range from 30% to 80% allows you to set the appropriate level for any room. Smart dehumidification, a precise temperature and humidity sensor, Laundry mode, and a five-layer noise-reducing design ensure efficient and quiet operation throughout the day. Plasma technology helps reduce bacteria and mold, and you can adjust the dehumidifier’s settings via the Dreamehome app or the LED touch panel.

High-capacity dehumidification of up to 20 liters per day

When humidity levels rise, its high capacity helps restore optimal indoor conditions more efficiently. The dehumidifier removes up to 20 liters of water from the air per day and can cover an area of up to 40 m², making it well-suited for larger spaces as well. The ability to dehumidify all day long allows for continuous operation—without limiting the unit to short cycles.

Humidity under control without constantly checking settings

The Dreame DD20 uses a precise temperature and humidity sensor along with a smart algorithm that automatically monitors indoor conditions and adjusts operation accordingly. The system takes into account the HEAT INDEX and real-time ambient temperature, allowing the dehumidifier to continuously adapt its operation to changing conditions. The humidity setting range from 30% to 80% gives you the freedom to choose the right level, and automatic control helps maintain comfort without the need for frequent adjustments. This solution also helps save energy.

Faster Laundry Drying

Clothes left hanging to dry can remain damp for a long time, especially when there is already a lot of moisture in the room. In such conditions, the Laundry mode comes in handy; it leverages the Dreame DD20’s high performance to more efficiently remove moisture from the environment, thereby helping fabrics dry faster. This means you don’t have to rely solely on natural evaporation—the dehumidifier actively improves indoor conditions when you want your laundry to dry faster.

Plasma Technology

A damp environment can lead to unpleasant, musty odors, which is why the Dreame DD20 does more than just remove moisture from the air. The Plasma Antibacterial Technology helps break down bacterial cell structures and inhibit their growth, as well as reduce mold and the unpleasant odors characteristic of damp conditions.

Quiet Operation

A dehumidifier often needs to run for extended periods, so the level of noise it generates is crucial for everyday comfort. The Dreame DD20 uses a five-layer noise reduction system that minimizes the sounds produced by individual components during operation. In Sleep mode, the noise level can be as low as 35.7 dB(A).

App Control and Easy-to-Read LED Panel

You don’t have to walk over to the dehumidifier every time you want to use its features. The Dreame DD20 supports control via the Dreamehome app, allowing you to manage the device from your mobile device as well. The unit also features a touchscreen LED panel on the housing, which makes direct operation easy and provides clear access to settings. So you can use the dehumidifier in whatever way is most convenient for you at any given moment.

Two Ways to Drain Water

During operation, condensed water collects in a 2.5-liter tank, so the dehumidifier can run without being connected to a drain. If you want to reduce the need to empty it regularly, you can use the continuous drainage feature and the included 1.5-meter drain hose. This solution is especially useful when the unit is running for an extended period and you don’t want to check the water level frequently.

Included

- Air dehumidifier
- Drain hose
- User manual

Manufacturer	Dreame
Model	DD20
Dehumidification capacity	20 L/day
Coverage area	Up to 40 m²
Humidity control range	30 to 80%
Noise level	35.7 dB(A) in Sleep mode
Tank capacity	2.5 L
Refrigerant	R290
Plasma	Yes
Continuous drain	Yes
Remote control	Dreamehome app
