UPERFECT M133J03 UColor O Lite 13.3" Monitor

Enjoy exceptional image quality with the UPERFECT UColor O Lite portable monitor, which combines OLED technology with 4K UHD resolution (3840 × 2160). The 13.3-inch screen delivers extraordinary image detail, while the wide 109.10% DCI-P3 color gamut and HDR support let you experience the richness of colors in movies, photos, and other visual content. A 1 ms response time and a 60 Hz refresh rate ensure a comfortable experience during everyday use. The entire unit is housed in a slim aluminum chassis just 8.5 mm thick, making the monitor an excellent choice as a secondary screen for work, entertainment, and creative applications.

Detailed 4K UHD Image

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

A resolution of 3840 × 2160 pixels on a 13.3-inch screen translates to an impressive pixel density of 331.26 PPI. As a result, even the smallest elements of the image—such as text or photographic details—are clear and easily visible. The 16:9 aspect ratio makes the monitor ideal for watching movies, working with documents, and enjoying various types of multimedia content. Additionally, the wide 178° viewing angles ensure good image visibility even when viewing the screen from the side.

OLED Technology – Deep Blacks and Rich Colors

The OLED panel offers a contrast ratio of 100,000:1, making the differences between light and dark areas of the image perfectly visible. A brightness of 390 cd/m² ensures a comfortable viewing experience, while HDR support further enhances the details and tonal range of the displayed content. The monitor also stands out with a wide color gamut of 109.10% DCI-P3 and 10-bit color depth, enabling the display of up to 1.07 billion colors. This combination is particularly well-suited for viewing high-quality content and working with photography and graphics, where precise color reproduction is essential.

Smooth Image and Lightning-Fast Response Time

The UPERFECT UColor O Lite offers a 60 Hz refresh rate, ensuring smooth image display while browsing the web, watching movies, or performing everyday tasks. An additional advantage is the response time of just 1 ms, which helps minimize motion blur of fast-moving objects. As a result, the monitor also performs well during fast-paced entertainment and when using applications where a quick display response is essential.

Versatile Connectivity

The monitor is equipped with a set of ports that make it easy to use various devices and accessories. You have two USB-C ports and one mini HDMI port at your disposal, enabling the transmission of video and audio. An additional USB-A port with OTG support allows you to connect a USB flash drive, keyboard, or mouse, enhancing the functionality of your workspace. There’s also a 3.5 mm AUX audio output, so you can use external audio equipment. These features make it easy to adapt the monitor’s use to your current needs.

Slim design and convenient setup

The aluminum housing gives the monitor an elegant look while ensuring a sturdy build. With dimensions of 310 × 190 × 8.5 mm, the device doesn’t take up much space and can be easily moved between workstations. What’s more, compatibility with the VESA 75 × 75 mm mounting standard allows you to mount the screen on a suitable mount, making it easier to organize your desk space. This lets you adjust the monitor’s position to your preferences and create a comfortable workspace or entertainment setup.

Sound Without Additional Speakers

The UPERFECT UColor O Lite features two built-in speakers, each with 1 W of power and an impedance of 8 Ω. With these, you can play audio while watching movies, giving presentations, or enjoying multimedia without having to connect a separate audio system. However, if you prefer to use external audio devices, a 3.5 mm AUX jack is available. The monitor also features a rated power of 12 W and does not have a built-in battery.

Included in the box

- Portable monitor
- USB-C to USB-C cable x2
- Mini HDMI to HDMI cable
- PD power adapter
- Set of M4 × 4 mm screws
- User manual
