MikroTik Cloud Router Switch 504-4XQ-IN, 4x 100G QSFP, 16x 25G Ports, PoE, RouterOS L5

Model: CRS504-4XQ-IN

Manufacturer: MIKROTIK

EAN: 4752224007407

Product Code: 1706463

R15,888

The **CRS504-4XQ-IN** by **MikroTik** is a high-performance networking device designed for intensive data processing and rapid network operations. This advanced switch is powered by the **QCA9531** processor, operating at a frequency of **650 MHz**, ensuring efficient handling of various tasks and applications.

Equipped with the **98DX4310** switching chip, the **CRS504-4XQ-IN** features **16 ports** with **25G** connectivity, providing robust options for seamless data transfer and multiple connections. This extensive port configuration makes it an ideal choice for environments requiring high bandwidth and low latency.

The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The **CRS504-4XQ-IN** is part of MikroTik's renowned product line, known for its reliability and performance in demanding networking scenarios. This model is particularly suitable for data centers, enterprise networks, and service providers looking to enhance their infrastructure with cutting-edge technology.

With its combination of powerful hardware and versatile connectivity options, the **CRS504-4XQ-IN** stands out as a premium solution for professionals seeking to optimize their network performance. Its design reflects MikroTik's commitment to delivering innovative and efficient networking solutions tailored to meet the needs of modern users.
