R5,453

Ultimea Aura A60 Soundbar

The Ultimea Aura A60 is a comprehensive audio system that offers cinema-quality sound, impressive power, and truly spatial audio thanks to four speakers and SurroundX technology. A subwoofer with adjustable BassMX™ technology delivers deep, controlled bass, while powerful drivers ensure precise and clear sound reproduction. The soundbar supports HDMI eARC and a wide range of connectors, offers advanced sound customization via an app, and convenient remote control, creating a complete, refined solution for movies, games, and music.

Sound that surrounds you

The Ultimea Aura A60 is designed for a truly spatial audio experience. The Dolby Atmos 7.1 Channel Surround Sound system surrounds you with sound, creating a realistic, multidimensional soundstage. Whether you're watching a Blu-ray movie or using streaming apps like Netflix or Prime Video on your smart TV or set-top box, if the content supports Dolby Atmos, the soundbar will fully decode and reproduce it.

Wider stage, deeper experience

SurroundX technology is responsible for the impressive spatiality. Advanced audio algorithms optimize the sound field based on signals from the left and right main channels, expanding the rear stage and creating a wide, open panorama. The result is a more immersive movie experience and clear sound positioning in games. The system is complemented by proprietary BassMX™ technology. The bass can be precisely adjusted to your preferences with 12 levels of adjustment, giving you exactly the intensity of low frequencies you need.

Power that makes a difference

The soundbar offers 350W of peak power, which translates into dynamic, energetic sound—from subtle dialogue to intense action scenes. Every element of the system works together to deliver 99.99% high-quality sound reproduction, including clarity, precision, and detail that movie lovers, gamers, and music enthusiasts will appreciate.

Advanced driver array

The rich sound is delivered by 8 high-performance drivers, including a soundbar (3 × 2" full-range driver), surround speakers (4 × 2" full-range driver), and a subwoofer (1 × 4" bass driver). This configuration ensures consistent sound across the entire frequency range and a realistic sense of immersion.

Smart control and full customization

The mobile app turns your smartphone into a smart remote control and offers a wide range of configuration options. Six EQ modes, a 10-band equalizer, and 121 preset EQ matrices allow you to perfectly match the sound to the content and your taste. In addition, a classic remote control is supported, allowing you to adjust the volume, equalizer, turn the device on and off, and select the source.

Stable connections, convenient control
