

Teltonika RUT906 4G/LTE RS232/RS485 Industrial Router

Model: RUT906000000

Manufacturer: TELTONIKA

EAN: 4779051840830

Product Code: 1713995

R5,607

The rut906000000 is a robust industrial router designed to provide secure and stable internet connectivity through 4G/LTE networks. It features both RS232 and RS485 interfaces, enabling seamless integration with a wide range of industrial equipment. This device supports dual-SIM functionality, allowing for network redundancy and ensuring continuous internet access even if one carrier experiences downtime. Equipped with advanced security protocols including firewall and numerous VPN services, it ensures that data transmitted across networks remains secure from unauthorized access. The router operates effectively in a wide temperature range, making it suitable for harsh industrial environments. Its compact design allows for easy installation in space-constrained areas, and it is compatible with the RMS (Remote Management System) for efficient remote monitoring and management. Firmware updates and device configuration can be handled remotely, minimizing the need for on-site maintenance. The rut906000000 also supports digital input/output for event management, enhancing its utility in automated processes. With its durable
