

Teltonika RUT976 RedCap 5G Router

Model: RUT976000000

Manufacturer: TELTONIKA

EAN: 4779051841745

Product Code: 1713997

R9,556

The **Teltonika RUT976** (Product Code: **RUT976000000**) is a compact industrial **5G Redcap router** designed for advanced networking solutions. Equipped with **4 Fast Ethernet ports**, **WiFi**, dual **SIM cards**, and **GPS**, this router supports a wide range of industrial applications. Its **RutOS** software enhances its capabilities, allowing for extensive customization and integration with various industrial protocols. The RUT976 is built to handle up to **100 wireless devices** simultaneously, providing a reliable connection with low latency at an affordable price point.

Designed for professional industrial use, the **RUT976** offers backward compatibility with **4G LTE Cat 4** for areas with limited **5G coverage**. It features automatic failover capabilities, ensuring continuous connectivity by switching to a backup WAN connection when needed. The router also includes a comprehensive set of interfaces, including **RS232**, **RS485**, and various I/O options, making it suitable for complex deployments. With its robust security features and compatibility with Teltonika's **Remote Management System (RMS)**, the RUT976 stands out as a versatile solution

for modern industrial networking needs.

Utilizing **RedCap 5G technology**, the RUT976 provides a balance between traditional **4G** and full **5G** capabilities, offering lower costs and greater flexibility for IoT applications. This router supports a wide array of LTE bands and is equipped with advanced features such as **VLAN functionality**, **wireless mesh**, and comprehensive **VPN support**, ensuring high performance and security for various networking scenarios. The **Teltonika RUT976** is engineered to meet the demands of industrial environments, making it a reliable choice for businesses seeking to enhance their connectivity infrastructure.
