

ARCTIC Liquid Freezer WS360-4710 Processor Liquid cooling kit 12 cm Black 1 pc(s)

Model: ACFRE00202A

Manufacturer: ARCTIC

Product Code: 1714042

R4,488

Liquid Freezer WS360-4710

Workstation All-in-One CPU Water Cooler

Outstanding Liquid Cooling for Workstations

The Liquid Freezer WS360-SP6 is an all-in-one liquid cooling solution designed for the AMD SP6 workstation platform. Featuring a specially mounting system for easy installation, it delivers outstanding cooling performance to meet the demands of high-performance workstations.

Designed for Superior Cooling, optimized for Workstations

Thanks to its radiator design and high-performance fans, the Liquid Freezer WS360-4710 delivers outstanding cooling under heavy loads while keeping noise levels comparable to competing solutions.

P12 Pro PST CO – Performance & Durability

The ARCTIC's P12 Pro PST CO pair the High Static-Pressure Performance of the P12 Pro with Dual Ball Bearings engineered for continuous 24/7 operation, ensuring durability and extended lifespan.

Tailored Made for LGA 4710

A fixed mounting system tailored for Intel LGA 4710 ensures optimal contact pressure on the CPU and user-friendly installation.

Water Block Design for 4710

The water block is optimized for 4710 with high-density micro-fins, efficient chamber flow, and a durable pump for long-lasting reliability.

Premium-Class Radiator

Liquid coolers with 38mm radiators offer superior thermal dissipation, and we continued integrating this design into our workstation models.

High Quality EPDM Tubing

EPDM tubing with braided sheathing to ensure durability and prevent leakage, protecting your components is our highest priority.
