

LogiLink SA0009 soldering iron/station accessory Solder wire

Model: SA0009

Manufacturer: LOGILINK

EAN: 4052792054408

Product Code: 1715280

R603

Product information "Solder wire Ø 0.56 mm (lead free), 0.7 % copper, 12.5 g dispenser" from LogiLink

With the LogiLink Professional solder wire you are well prepared for your work. Whether for home or professional use, choose the right wire for you and solder professionally. Due to the low melting point (190°C) and the very good electrical conductivity, very little smoke is produced while soldering. This is not only healthy, but also environmentally friendly. The flux should also prevent oxidation of the solder joint, as it prevents rapid deflagration and evaporation.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
