Product Code: 1715413

R5,705

It’s time to Speak Up

The best professional speakerphone for hybrid working.

Where’s your meeting room today?

This is Speak2 75, your personal pocketable device for the coffee-table-conferencing, dining-room-dialing, hotel-hot-desking meeting rooms of a hybrid world.

It’s the next generation of professional, portable speakerphone, packed with the very latest technology.

With our advanced super-wideband audio*, precision microphone performance and technology that refines the subtle tones in your voice, today’s meeting room could be a huddle room, the couch or a campervan on the beach (you can get WiFi on the beach, right?)

W i d e s c r e e n for your ears

Forget everything you think you know about portable speakerphones. We’re tearing up the rule book with super-wideband audio*, and an advanced full range 65mm speaker.

“Say what?”

Well, that’s not a question you’ll need to answer, because this advanced tech puts you (and your big ideas) front and centre in every meeting, unscrambling the widest range of frequencies in your voice’s natural range, for a dramatically more powerful audio experience.

Crystal-clear calls and rich, powerful music. What’s not to love?

Let it flow

You know those sounds you make to show you’re listening and engaged? Some speakerphones don’t allow both sides of the conversation to speak and be heard at the same time, so those little ‘ooohs’ and ‘aaaahhhs’ of encouragement fall on deaf ears. Or worse, interrupt the flow for everyone.

We think conversations are better when they feel natural, so Speak2 75 is engineered with advanced full duplex audio, with a supercharged chipset that goes way beyond standard speakerphone performance. So your conversations can flow freely in both directions, just like they would in person.

Don’t neglect the mute button though. Nobody wants to hear you eating your lunch.

Most valuable player

With four state-of-the-art beamforming microphones and the very latest digital signal processing algorithms, it’s safe to say Speak2 75 is truly at the top of its game.

Wherever you put it – a table, a desk, a floor – it’ll effortlessly field sound from all directions, harnessing every change in voice tone, so every nuance is picked up (because it’s not what you say, but how you say it). All while our innovative noise reduction technology deftly bats away distracting background bother like tippy-tappy keyboards and extra-crunchy crisps.

The result is an outstanding audio experience that’s truly unmatched.

When it comes to prioritising your voice, we’re not playing around.

Let’s be clear

Speak2 75 lets you see at a glance how well your voice is being picked up, at all times, wherever you are in the room, because it’s the only speakerphone to feature a custom-designed Microphone Quality Indicator.

This intuitive 360-degree light ring shows you clearly when you’re coming across loud and clear and when you need to huddle in a little closer.

It’s like having your own personal voice coach in every meeting.

It wouldn’t do for us all to be the same

Booming Barbara will always be louder than Reserved Roger, but that doesn’t make what she has to say any more important. We know how vital it is to give everyone an equal seat at the virtual table, so we engineered Speak2 75 with our latest cutting-edge Voice Level Normalization technology.

It means everyone in the room will always be heard whether they speak quietly with confidence or raise their voice to make their point. Everyone can be themselves and speak naturally, so you can all focus on the topic in hand rather than fiddling with volume controls.

All together now

It doesn’t matter whether you’re working from your kitchen table, your office desk or your treehouse, if your speaker works smoothly with your virtual meeting platform, you can get together anywhere.

Speak2 75 is certified for all leading platforms (which means it optimises the whole experience and delivers professional call quality every time). So whether you prefer to jump on Microsoft Teams, Google Meet or Zoom, you can rely on seamless plug-and-play connectivity and reliably brilliant meetings right from the get go.

Chuck us a puck

The iconic, much-loved ‘puck’ shape (as nicknamed by our ice hockey-loving customers) of the original Speak Series gets a serious makeover with Speak2 75. It’s modern and minimal, with brushed aluminum detailing and premium custom-designed speaker fabric, engineered to deliver the most optimal audio experience.

It’s also small and durable enough to chuck into your bag. We wouldn’t recommend playing ice hockey with it though.
