you a taste of the past with all the benefits of digital technology. Aspiring DJs, take your first steps towards spinning on vinyl with authentic turntable materials, for authentic DJ moves.

A unique motorized DJ controller that will make you stand out

DJs can precisely blend and beatmatch thanks to the standard-sized 7" platters that quickly accelerate from 0 to 33⅓ RPM. Additionally, they can remove the vinyl discs and slipmats from the platters, recreating an authentic turntable experience in a digital format.

It’s your turn to get creative

Stems – the essential, real-time audio separation tool every DJ needs. With one-button controls to isolate vocals or instrumentals, DJs can effortlessly create personalized mixes on the fly. The possibilities for creating new mashups and blends are endless. Available in DJUCED and Serato DJ.

Perfect your transitions

Equipped with three FX Select buttons, a paddle, and a Filter knob for each deck, along with an extra control knob and Beat -/+ buttons, the DJControl Inpulse T7 White Edition offers DJs the tools to fine-tune their mixes and transitions using a wide array of effects.

Equipped with powerful learning tools

The controller's interactive features, like the Beatmatch Guide and Intelligent Music Assistant (IMA), offer real-time feedback to help users quickly develop their skills. The Beatmatch Guide shows how to adjust the tempo fader or jog wheel for beatmatching, while the IMA suggests the best upcoming tracks based on energy, key, and tempo.
