

Conceptronic Optical Drive Sharing Cable USB

Model: CUSBODDSHARE

Manufacturer: CONCEPTRONIC

EAN: 8714909024822

Product Code: 1717077

R1,184

This Optical Drive Sharing Cable USB offers the ideal solution for netbooks, notebooks and/or tablets which have no built-in optical drive. Simply connect the cable, share your optical drive with the computer without an optical drive. From that moment on you can easily access all files and folders in the optical drives. It even allows you to install programs from the ‘external’ optical drive. This way you don't need to worry anymore about how to install drivers or watch videos when an optical drive is required.

- Share your optical drive with a netbook, notebook and/or tablet without a built-in optical drive
- Install programs and/or watch videos using a different computer as source
- Plug and Play, the software is integrated in this cable
