SMALLRIG RF 10C LED Video Light

The SmallRig RF 10C is a portable 10 W LED video light equipped with four LED colors: white, red, blue, and orange, which mimics the color of a sunset. It allows for adjustment of brightness and beam angle within a range of approximately 10–60°, offers over 20 effect filters, and its CRI Ra≥96 and TLCI≥98 ensure accurate color reproduction. At a color temperature of 5600 K, the light intensity reaches up to 1570 lux at a distance of 0.5 m, while the built-in 7500 mAh battery allows for approximately 3 hours of continuous operation at full power. Thanks to its compact design, the lamp is ideal as a backlight or background light when recording with a smartphone, live streaming, creating online content, or shooting at events and weddings.

Adjustable beam and over 20 lighting effects

The front lens with a push-pull mechanism allows you to adjust the size of the light beam and tailor it to a specific shot. The angle adjustment range is approximately 10–60°, so the light can be focused

more intensely on a selected part of the scene or diffused over a larger area. The smooth-operating zoom mechanism with just the right amount of resistance makes it easy to precisely adjust the beam, and over 20 included filters allow you to create a variety of atmospheric and color effects. As a result, a single light can be used for both standard lighting and more creative background setups.

Convenient operation and various mounting options

The SmallRig RF 10C housing is made of aluminum and ABS plastic, which allows for a compact design while maintaining a sturdy construction. The handle, with a diameter of approximately 4.3 cm, fits comfortably in the hand, so the light can also be used conveniently while working without an additional tripod. Three 1/4"-20 threaded holes on the side and back allow for mounting compatible accessories and creating various lighting setups. The design prevents accidental activation by requiring you to turn the knob to turn on the light, which helps minimize unintended use of the device and unnecessary energy consumption.

Built-in Battery and USB-C Charging

The built-in lithium battery, with a capacity of 7,500 mAh and energy of 27.75 Wh, provides approximately 3 hours of continuous light at maximum power. This allows you to use the light during longer shoots and sessions without having to frequently interrupt your work to recharge the device. The battery is recharged via a USB-C port at 5 V / 2 A with a maximum input power of 10 W, and a full charge takes up to approximately 6 hours. The light is compatible with accessories featuring a 1/4"-20 mount, including the SmallRig RA-S200 lighting tripod.

Included in the set

- SmallRig RF 10C light
- Filters x 20
- Silicone filter holder
- Carrying bag
- USB-C cable
- User manual
- Certificate of conformity
- SmallRig manufacturer’s packaging

Manufacturer	SmallRig
Model	RF 10C (4634)
Power	10 W
Number of LED types	4
Light intensity	1,570 lx at a distance of 0.5 m at 5,600 K
CRI Ra	≥96
TLCI	≥98
Beam angle adjustment	approximately 10–60°
Number of filters	over 20
Battery	lithium, built-in
Battery capacity	7,500 mAh
Battery voltage	3.7 V
Battery energy	27.75 Wh
Operating time	approximately 3 hours at full power
Charging	USB-C
Charging voltage and current	5 V / 2 A
Maximum input power	10 W
Charging time	up to 6 hours
Mounting	3 × 1/4"-20 threads
Material	aluminum alloy, ABS
Product Dimensions	154 × 52 × 49 mm
Weight	422 ± 10 g
Compatibility	accessories with 1/4"-20 mounting, SmallRig RA-S200 tripod
