Imou AOV Air 4G Kit(without card)

Model: IPC-B3LP-5B0T1-EU/FSP12-TYPEC

Manufacturer: IMOU

EAN: 6937479648126

Product Code: 1717500

R2,359

AOV Air 4G

5MP

24/7 Recording 4G Battery Camera

AOV Mode. Smarter About What It Records.

It records continuously when an event occurs; when nothing happens, it switches to lightweight snapshots at your selected intervals. This allows you to preserve a spatial timeline while making smarter use of storage space.

Adjustable Performance Modes. Improved Battery Life.

Set the recording behavior you want at different battery levels. Choose AOV, Event or Power Saving mode for different battery levels. AOV Air 4G can automatically adapt its recording behavior as power changes, helping you stay protected while making the most of every charge.

Turn Time Into a Story.

Watch a day, a garden, or a project unfold in minutes. With Time-Lapse, AOV Air 4G can turn long periods of change into short, shareable videos. Capture a sunrise, a growing garden, a home project or a memorable day from a whole new perspective.

Small Camera. Serious Detail.

See more of the moments that matter in crisp 3K clarity. The 5MP sensor delivers 3K resolution for clear, detailed video—so a compact, easy-to-place camera can still give you the visual confidence you expect from a full-size security camera.

Keep Watch After Dark.

Choose the night vision mode that fits the scene. Use Smart, IR or Off mode to match different lighting conditions and personal preferences. AOV Air 4G keeps your monitoring flexible from daytime activity to nighttime security.

Know When It Matters.

Human and vehicle detection helps turn activity into useful alerts. Instead of watching a live feed all day, let AOV Air 4G help identify human and vehicle activity and notify you when something worth your attention happens.

Promptly Warn And Stop Intruders.

A spotlight and siren can respond when unwanted activity is detected. When a detected intrusion triggers an alarm, the built-in spotlight and siren can draw attention and discourage unwanted visitors—before you even open the app.

Talk From Wherever You Are.

See what's happening—and speak up when you need to. Use two-way talk to communicate with family members, visitors or people in the monitored area without walking over to the camera.

Privacy, One Tap Away.

Pause monitoring when you want your private space back. When you want privacy, activate Privacy Mode in the app with one tap. Your camera can step back when you do.

4G Network Connectivity

4G network connectivity lets you use your camera anytime, anywhere.
