n a nutshell

A legend returns with Viper TQS, the famous throttle quadrant system from the Viper, officially licensed by the U.S. Air Force and compatible with PC. Take your cockpit to the next level of performance and experience outstanding ergonomics with a 1:1 scale replica featuring metal handle casing and buttons, plus realistic and iconic control switches. Viper TQS replicates the realistic controls, flight kinematics and sensations experienced by real Viper pilots.

UNDER THE HOOD

OFFICIAL REPLICA OF THE VIPER CONTROL PANEL

Expand your combat capabilities with this U.S. Air Force Viper Panel for PC. Experience absolute realism thanks to the control panel’s design, which replicates controls from the Viper cockpit — including landing gear lever with indicator lights.

ERGONOMIC FLIGHT CONTROLS

Get ready for intense takeoffs, combat and landings with 43 metal action buttons (including 11 virtual buttons), one trim wheel (axis), MODE and PGRM rotary selectors on the CMDS panel, jettison, laser sighting, jammer and weapon launch switches.

ADJUSTABLE BACKLIT PANEL

Viper Panel provides lifelike replica sensations as a backlit panel with adjustable indicator lights on the landing gear controls and TWA (Threat Warning Aux) panel for absolute realism!

A VERSATILE PANEL

Unleash the potential of Viper TQS (sold separately) by expanding its flight and combat capabilities with this comprehensive backlit control panel! You can also add it to your existing cockpit setup as a standalone unit for better in-flight versatility.

COMPLETE YOUR ECOSYSTEM

Turn your setup into a real military cockpit with Thrustmaster replica products, officially licensed by the U.S. Air Force. From flight sticks to rudder systems, the Thrustmaster ecosystem has everything you need to be a real flying ace. Strike Hard, Strike Fast!
