EVEN REALITIES R1 Smart Ring, size 10

The EVEN REALITIES R1 is a smart ring designed to work with EVEN G2 glasses, while also serving as an advanced health monitoring ring. The smart ring allows you to track your body’s most important vital signs both during the day and while you sleep. It records, among other things, heart rate, blood oxygen levels, skin temperature, and activity, and the collected data helps assess the quality of your rest and your readiness for daily challenges. The ring’s touch-sensitive surface also allows you to control EVEN G2 functions using simple gestures. The design, made of zirconia ceramic and medical-grade stainless steel, combines an elegant finish with durability, and the IP68 rating protects the device from splashes and allows for brief immersion in water. Rounding out the package is a battery life of up to 4 days and an app available for iOS and Android devices.

Keep Track of Your Vital Signs

The EVEN R1 collects data throughout the day, helping you gain a better understanding of your physical condition. The ring measures heart rate and heart rate variability (HRV), blood oxygen levels, skin temperature, and activity. An LED array on the inside measures your heart rate, a thermometer monitors your temperature, and an accelerometer counts your steps, calories burned, and distance traveled. The data is available in real time, so you can access it whenever you want to assess your activity, how you're feeling, or how prepared you are for the rest of the day.

Detailed insight into your sleep

Smartring works even while you sleep, analyzing the pattern and quality of your rest. It records individual sleep phases, so in the morning you can see when your sleep was light and when it was deep, as well as identify moments when you woke up. The ring also tracks temperature changes throughout the night. The collected data provides a clear picture of your nighttime recovery and helps you assess how well you rested and how ready you are to start the next day.

Productivity Score Feature

Your daytime performance depends on both physical activity and concentration, decision-making speed, and the ability to stay focused under pressure. That's why EVEN REALITIES developed the Productivity Score, an indicator of mental readiness. A score of 80 or higher indicates peak mental condition. This feature helps you assess your level of mental readiness, which is especially useful before tasks that require concentration, efficient decision-making, and clear thinking under pressure.

Touch Control

The smooth surface of the EVEN R1 functions as a subtle touch panel that responds to finger taps and scrolling. Using simple, almost imperceptible gestures, you can control the EVEN G2's functions and customize how you use the device without reaching for your phone or making any obvious hand movements. The ring thus becomes a natural part of the EVEN REALITIES ecosystem, combining access to health and activity data with discreet control of the EVEN G2. The outer part of the ring is made of zirconia ceramic—a material prized for its durability and used, among others, by Swiss watchmakers. The EVEN R1 also meets the IP68 standard, making it splash-resistant.

Up to 4 days of battery life

The battery provides up to 4 days of operation, allowing the EVEN R1 to collect data during both daily activities and nighttime rest. The ring works with the EVEN G2 Companion app, available for iOS and Android devices. EVEN REALITIES also protects your privacy—data is not stored in the cloud without your explicit consent. If data processing is necessary, the information is encrypted and sensitive personal data is removed, ensuring you retain control over your information.

Included in the package

- EVEN R1 smart ring
- magnetic charger
- user manual

Manufacturer	EVEN REALITIES
Model	Even R1
Thickness	3.1 mm
Width	7 mm
Size	10
Color	Gray
Material	Zirconia ceramic exterior, stainless steel interior
Coating	Fingerprint-resistant
Features	Sleep tracking (sleep duration, sleep stages, sleep quality), daily activities, health, productivity score
Sensors	Touch sensor, PGG sensor (red, green, and infrared LEDs), skin temperature sensor, accelerometer
Bluetooth	BLE
Battery life	Up to 4 days
Charging	Wireless magnetic charging, 1–1.5 hours
Water resistance	IP68
Certifications and safety	Electromagnetic field safety, FCC certification
