OFDMA, beamforming, and MU-MIMO are technology enhancements that extend the coverage of your gaming network to more devices. RadiX AXE6600’s superior performance can meet and exceed all your needs for gaming, AR/VR and productivity.

FASTER THAN EVER

RadiX AXE6600 delivers lightning fast transfer speeds up to 6600Mbps. Download, stream, and game like never before.

EASIER OPTIMIZATION

RadiX AXE6600 has a built-in AI engine that can automatically prioritize network traffic. Stay on top whether it’s gaming, binge watching streaming media, or getting work done.

MSI FIRST

Minimize lag and latency to your connected MSI gaming devices* via MSI center.

MULTI-GIGABIT PORT WITH FLEXIBLE SETTING

Equipped with 1x 2.5 Gigabit port and 4x Gigabit ports. The 2.5 Gigabit port can be reassigned to handle either internet or LAN.

Browser

Control your network with a comprehensive set of features while wired or wireless

MSI Router App

Use the MSI Router App to use quick setup and check your network status anywhere

MSI Center

Manage network and control the light effect in MSI center

LIGHT’S ON

The antenna and dragon shield colors can be tailored to indicate the AI QoS mode or a light effect via MSI center.
