EXPERT SDS Clean plus-8X Set for Advanced Dust Reduction

Drilling accurate holes in concrete is just one step in the process of installing chemical anchors. Next come time-consuming cleaning rounds. It’s different when you use the EXPERT SDS Clean plus-8X. It drills holes and removes dust at the same time, making installing chemical anchors faster and simpler.

We made the EXPERT SDS Clean plus-8X Set for construction workers and installers who need to drill holes for chemical anchors. The drill bit comes with a 4-cutter full carbide head and robust dust extractor pipe. We equipped it with the SDS Clean plus Connector, which fits all SDS Clean plus-8X drill bits and is easy to mount and detach. What you get is a powerful drill bit you can easily clean when it's clogged (by simply removing the extractor pipe from the drill bit) and a new dust reduction technology helping you prepare holes for chemical anchors faster and keep the air on the jobsite
