Mikrotik Passive Gigabit PoE injector with surge protection, indoor enclosure

Model: GESP+POE-IN

Manufacturer: MIKROTIK

EAN: 4752224007223

Product Code: 1720481

R805

The **GESP+POE-IN** is a passive Gigabit Power over Ethernet (**PoE**) injector designed by **MikroTik** to simplify the simultaneous delivery of data and power through a single Ethernet cable to compatible devices. This innovative solution is ideal for various networking applications, ensuring efficient connectivity and power supply in one streamlined package.

Supporting Ethernet speeds of **10/100/1000 Mbit/s**, the **GESP+POE-IN** guarantees fast and reliable connections for a wide range of devices. Whether you are setting up a new network or expanding an existing one, this injector provides the necessary performance to meet your requirements.

The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Compliant with **IEEE 802.3af** and **IEEE 802.3at** standards, the **GESP+POE-IN** is suitable for use with a broad array of **PoE**-enabled devices, making it a versatile addition to your networking toolkit. Its compatibility ensures that you can power devices such as IP cameras, wireless access points, and VoIP phones without the need for additional power sources.

With its robust design and reliable performance, the **GESP+POE-IN** from **MikroTik** is an essential component for anyone looking to enhance their network infrastructure. This model not only meets the demands of modern networking but also provides peace of mind with its proven technology and adherence to industry standards.
