R18,223

Capture distant wildlife, sports and family adventures with this versatile Canon RF 100-400mm F5.6-8 IS USM Lens. It’s a superb EOS R-series zoom with an advanced 5.5-stop Optical Image Stabilizer, a great close focusing capability, plus a powerful telephoto reach to bring all those important moments closer. A nine-blade circular aperture separates the subject from the background beautifully with lovely out of focus highlights and bokeh. Plus, it’s comfortable to hold for longer periods, weighing 635 g and measuring 164.7 mm in length. Thanks to Canon’s well-known Aspherical lens element and Ultra-low Dispersion (UD) glass with Super Spectra Coating, you can enjoy pin sharp images full of detail in both stills and movies.
