Product Code: 1722634

R1,163

The post’s here! The post is now delivered electrically in German towns. The Streetscooter creates only a slight hum. The electric transporter is designed specifically for the requirements of parcels delivery. Compact, manoeuvrable, and pretty nippy in city traffic. The flush front headlights underline the distinctive front design. In the detailed 1:50 scale miniature, the driver’s cab and chassis are made of metal, and in addition the plastic rear flap of the van body can be opened.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
