Sound mastered. Noise cancelled.

Refined shape. Naturally comfortable.
Shaped with intention. The fit feels personal—secure, light, and balanced—so every moment of listening feels just right.

Premium sound, co-created with the masters

Hear music as it was meant to be. Co-created with world-renowned mastering engineers, these earbuds deliver studio-level precision—preserving every nuance, every note, exactly as the artist intended.

Overwhelming quiet for anyone, anywhere

Block out more of the world when you need to. Working together, HD Noise Cancelling Processor QN3e, Integrated Processor V2, Multi Noise Sensor technology, Adaptive NC Optimiser and the snug, sealing fit help maintain strong noise cancelling in a wide range of everyday environments.

Sound quality, at its best

Hear more of the music you love. The original driver* and advanced processing reveal fine textures and space, while careful sound tuning keeps everything balanced wherever you listen.

Our best call quality ever

Two microphones work with a bone conduction sensor to detect your voice while AI beamforming steers pickup and reduces ambient noise. The person on the other end hears you, not your surroundings.

Ergonomic beauty. Crafted precision.
The ergonomic form fits comfortably in more ears, easing pressure for long listening. Finished in a premium matte texture, it feels soft to the touch and looks as considered as it sounds.

Designed for the flow of daily life
