R1,393

The LogiLink hard drive protective case is a safe storage for external hard drives. The padding protects the drives during transportation and provides space for your accessories. The solid case shields your hard drives from dust and dirt. The integrated lock secures against unauthorized access.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
