Huawei OceanStor 5120 V6 Storage System (2U, dual controllers, SAS, AC/240V HVDC, 64GB cache, 8x 1Gb ETH, 4x 10Gb ETH multi-mode SFP+, 4x SAS 3.0, 25x 2.5 SAS)

Model: 02356FRT

Manufacturer: HUAWEI

Product Code: 1724010

R100,355

The **Huawei 5120** is a high-performance storage solution designed for enterprise environments, featuring a robust architecture with **dual controllers** for enhanced reliability and performance. This model, identified by the code **512V6-S-S-64G-AC**, is equipped with **64GB cache** and supports **SAS 3.0** ports, ensuring rapid data access and transfer speeds. With a total of **25 2.5-inch SAS drives**, this system is optimized for demanding applications that require efficient data management and storage capabilities.

Equipped with **8 1Gb Ethernet** and **4 10Gb Ethernet** ports (including Multi-Mode SFP+), the Huawei 5120 facilitates seamless connectivity and high-speed data transfer, making it an ideal choice for data centers and enterprise networks. The integration of **HVDC technology** ensures energy efficiency, reducing operational costs while maintaining optimal performance. This storage solution is part of Huawei's commitment to delivering cutting-edge technology and reliability in data storage.

Designed for scalability and flexibility, the Huawei 5120 is suitable for various applications, from virtualization to big data analytics. Its advanced features and robust design make it a standout choice in the competitive landscape of enterprise storage solutions, providing businesses with the performance and reliability they need to thrive.
