Mars Gaming MPIII650 PC ATX 650W Power Supply 5 Years Warranty Silent AI-RPM Technology 85% Efficiency Black

Model: MPIII650

Manufacturer: MARS GAMING

EAN: 8435693103479

Product Code: 1724389

R1,940

MPIII650 POWER SUPPLY

5 years warranty thanks to the latest high-precision SMD manufacturing technology, double-layer fiberglass PCB and A-grade components for total reliability. Maximum silence with the new AI-RPM technology. 99% DIGITAL APFC efficiency, 85% electric efficiency, extra-long black flat cables and all protection and safety systems included.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

5 YEARS WARRANTY. 85% EFFICIENCY

650W of power

85% EFFICIENCY

5 YEARS WARRANTY

AI-RPM SILENT TECHNOLOGY

5 YEARS WARRANTY. TOTAL SECURITY. SMD.

Thanks to the latest high-precision SMD manufacturing technology and the use of the highest quality and reliable A-grade components, the MPIII650 offers an extended 5-year performance warranty. Its ultra-stable SMD fabrication on a double-layer fiberglass PCB ensures extreme performance and reliability under any circumstances. In addition, the MPIII650 integrates the most advanced and complete electronic safety systems: OVP (over voltage protection), UVP (under voltage protection), OCP (overpower protection), OPP (overpower protection) and SCP EXTENDED (total internal and external short circuit protection). The MPIII650 has been developed in Europe and manufactured under the strictest European standards.

ABSOLUTE SILENCE. AI-RPM AND FDB.

Equipped with the latest AI-RPM fan control technology ideal for ensuring noise-free operation, the MPIII650 PSU features state-of-the-art intelligent thermal control based on advanced algorithms and multilevel control systems to keep the fan to a minimum. In addition, the MPIII650 features an industrial-grade fan with dynamic fluid bearing and extra-large motor to maximize its stability. All available technology to ensure minimum noise and maximum efficiency and durability.

PROFESSIONAL EFFICIENCY

With 99% efficiency in the DIGITAL APFC system and 85% electric efficiency you will achieve a perfect balance between efficiency and consumption. In addition, its +12v single-rail technology allows you to install the most demanding hardware.

OPTIMIZED CABLE DESIGN

The MIII650's cables are flat, black, and extra-long: a combination of features that make installation not only easier than ever, but also totally versatile for any mounting in any type of case. Build the ultimate PC with an oversized tower and enjoy your games in style.
