EXPERT M480 SANDING NET FOR ADVANCED DUST REDUCTION SANDING WOOD, PAINT AND DRYWALL

Dust is the big drawback of sanding. It clogs your sandpaper, rendering it ineffective. It coats everything in the room and permeates the house. That’s why we’ve come up with Bosch Particle Control technology and taken dust reduction to a new level.

Reducing dust when sanding is not easy, but we've found a solution. This Bosch EXPERT M480 Sanding Net uses our Particle Control technology to keep the dust level to a minimum.
