Recycled) plastic, ensures not only the products' durability but also commits to a greener world. Our commitment extends to incorporating sustainable materials in both our product design and packaging. The PRO DP80 Series embodies sustainable value and heightened productivity.

Built to Last, Ready for Work

MSI desktop PCs are engineered for durability, reliability, and long-term performance. Each system undergoes rigorous testing—including military-grade standards and strict in-house quality checks—to ensure it meets the demands of everyday use.

Chassis Intrusion

Chassis intrusion detection is a hardware security feature found in MSI business-grade PCs. It alerts IT administrators when a computer’s case has been physically opened, helping prevent unauthorized access to internal components.

Secure Inside and Out

MSI desktop PCs offer both virtual and physical protection with features like dual LAN for network redundancy, dTPM 2.0 for data encryption, and Kensington lock and padlock support for added physical security—keeping your system safe online and offline.

Dual LAN 2.5G & 1G

Connect and transfer data quickly over a high-bandwidth, low-latency LAN.

Kensington Lock & Padlock

Secure the unit with a Kensington lock featuring a padlock combo design.

dTPM Support

dTPM encrypts data and passwords for secure, hardware-based protection.
