The new Kanguru UltraLock Superspeed+ USB-C M.2 NVMe External SSD provides exceptionally fast read/write speeds and a generous amount of data storage, along with a convenient physical write protect switch. The portable enclosure combines a sleek, metal housing with SuperSpeed+ USB 3.1 Gen 2 connectivity to make the Kanguru UltraLock USB-C M2 NVMe a super-fast and powerful solution for storing your data. With up to 675MB/s Sequential Read speed and 575 MB/s Sequential Write, it’s one of the fastest external USB drives on the market.

The physical write protect switch provides peace of mind to work safely on any computer, allowing you to quickly and conveniently switch to read-only mode if you suspect a virus on a workstation. Read-only mode protects the drive from being written to, and important files from being accidentally saved over or deleted.

Available capacities:
1 TB / 2 TB / 4 TB
