The Kanguru Defender Elite30™ USB3.0 flash drive is loaded with security features and convenience. With a physical write protect switch, AES 256-bit hardware encryption, Superspeed USB3.0 interface and remote management capabilities, this is one impressive flash drive. The SuperSpeed USB3.0 makes the Kanguru Defender Elite30 one of the fastest drives on the market with data transfer read speeds of up to 140MB per second and write speeds of up to 40MB per second. The convenient physical write protect switch enables the user to quickly switch back and forth between read only and read/write modes to prevent overwriting files if desired.

Product Description

The new Defender Elite30™ is our newest addition to the Kanguru Defender line, and provides an unparalleled combination of features. Scheduled to launch in April of 2014, it boasts super-fast USB 3.0 transfer speeds, military grade hardware encryption, a physical write protect switch and remote management capabilities.This USB flash drive is loaded with security features and convenience.

AES 256-bit Hardware Encryption

Hardware encryption is the backbone of the Defender Elite30's security, providing top tier performance unmatched by software encryption solutions. In addition, Password matching and security functions are contained in the cryptographic chip, meaning that the encryption can't be circumvented, further ensuring your data is secure.

On-board Anti Virus

Every Kanguru Defender Elite30 comes with an integrated onboard anti-virus (30-day FREE trial). Built into the drive, this feature prevents the Kanguru Defender Elite30 from being used as a vehicle for transporting viruses and malware. The anti-virus can also be used to scan the host computer(s), in effect becoming a portable anti-virus solution for every PC you work on.

Remotely Manageable
