- Light sensor and Li-ion battery for extended use
- Automatic file download via USB for quick transcription

Professional transcription solution

- SpeechExec workflow software for efficient data management
- Ergonomic foot pedal for convenient playback control
- Lightweight stereo headphones for enhanced wearing comfort
- Priority information for getting urgent jobs processed first

Two microphones for superior stereo audio recordings

The built-in microphones always deliver superior stereo audio recordings. The crystal clear recordings are perfectly suitable for speech recognition.

High recording quality in DSS and MP3 format

The DSS format was developed for use in digital voice recorders, allowing a high compression ratio with little loss of quality. The DSS format also allows you to store additional information in the file header, which facilitates the organization and the transcription of dictation files. The MP3 format is the common audio format for consumer audio storage, as well as a de facto standard encoding for the transfer and playback of music on digital audio players.

Convenient push-button for professional recording control

The recorder is designed for single-handed operation of all recording and playback functions, allowing easy and quick file editing (insert, overwrite, append) via convenient push-button operation.

Robust stainless steel casing for extra durability

The asymmetrical and ergonomic shape fits perfectly into your hand. Its slim and lightweight design maximizes comfort, even when working over longer periods of time. The brushed stainless steel creates a robust and highly durable protective shell around the device.

Large color display and clear user interface for easy, intuitive operation

The large full-color display offers sharp images, making it easier to see everything at first glance. The clear user interface is optimized for easy, intuitive operation.

Light sensor and Li-ion battery for extended use

The high-capacity Li-ion battery can be easily charged through a standard micro USB jack. The integrated light sensor guarantees extended battery life. The smart technology adjusts the brightness of the display, ensuring that your recorder will always be ready to work when you are.

Automatic file download via USB for quick transcription

When plugged in, the dictation device automatically uploads your audio files directly onto the computer and into the SpeechExec dictation workflow.

SpeechExec workflow software for efficient data management

The SpeechExec software organizes the workflow of dictation files and resulting documents between author and transcriptionist, and allows you to monitor the status of your work.

Ergonomic foot pedal for convenient playback control

Ergonomic foot pedal for hands-free control of all transcription and playback functions. The slim, ergonomic design guarantees operation with minimal physical strain.

Lightweight stereo headphones for enhanced wearing comfort

Lightweight, under-the-chin-style stereo headphones designed to deliver excellent sound quality, with soft ear cushions for enhanced wearing comfort.

Priority information for getting urgent jobs processed first

With the included priority setting option, urgent recordings can be processed first. This makes sure important recordings are not overseen and helps you and your transcriptionists manage your workloads better.
