The modular Lava Fortress is absolutely impregnable! It comes equipped with a stone catapult, a crossbow, a wall press, and a mechanical grabber arm. Projectiles can be fired at attackers via the roller track. As if that weren't daunting enough, the Lava Tarantula lurks menacingly, itching to join the battle!

The Lava Tarantula is one of the most dangerous creatures in the Lava World. Nobody can get past her! Did she just hear something? She readies her catapult. As a precaution, she also loads an arrow into her crossbow so she can drive off any attackers from afar. If they get any closer, she’ll quickly use her large grabber arm to take the intruders captive!
