Full Overview

Whether you prefer gaming on two monitors or if you enjoy streaming, the Trust GXT 1120 Mara will help you out. This dual-monitor solution will allow you to attach two monitors, up to 32 inches each, while keeping your desk clean from cables thanks to the cable management system. It will provide you with all the flexibility you need to place your monitors just the way you'd prefer.

Double the Viewing Space

If you want to use two screens, either for gaming, streaming or editing, the Trust GXT 1120 Mara is just what you need. This dual-monitor arm will hold two screens up to 32" with a combined weight of

16kg, without them taking up any space on your desk. That leaves more room for gaming.

Flexibility

Thanks to the flexibility of the Mara, you'll place the monitors just how you'd prefer. Adjust the height of your monitors to improve your posture and prevent back strain, and tilt, swivel and pivot them to create the setup you want. And because this arm works with any monitor that supports VESA 75 and VESA 100 mounts, you can choose pretty much any monitors you want.

Clean

Two monitors usually mean double the cables, but the Trust GXT 1120 Mara has got you covered. The integrated cable management system will keep all of those cables out of sight. There's no need for monitor stands, so all of the real estate space of your desk remains. That's a lot of freedom of movement.
