

GIGABYTE MC13-LE1 AMD B650 Socket AM5 micro ATX

Model: 9MC13LE1MR-000

Manufacturer: GIGABYTE

EAN: 4719331849917

Product Code: 1729404

R11,617

AMD EPYC™ 4004 for 24x7 Business Growth and Manageability

AMD EPYC™ 4004 Series Processors are a welcome addition to the 4th Gen AMD EPYC™ processor family, lowering the threshold for businesses and hosting services that have been wanting to move to a platform with a server OS and other enterprise features, yet at an optimal price point in GIGABYTE solutions. SMB and hosting services rely on server-grade reliability so they can continue running 24x7. At the same time, they need to have a higher degree of manageability. On top of validating, GIGABYTE provides GIGABYTE Management Console (GMC) for system management and GIGABYTE Server Management (GSM) software for monitoring multiple servers.

The Rising AM5 Platform

AMD AM5 Socket is versatile as it can support the consumer platform yet is able to step into the field of enterprise-level applications, and GIGABYTE has motherboards, workstations, and servers to support it. Taking advantage of its low cost per core and high core count options, the first processor on this platform, the AMD Ryzen™ 7000 Series, has proven its value in the enterprise server market. Its successor, the AMD EPYC™ 4004 Series, now further expands capabilities by including even more enterprise features. These “Zen 4” architecture processors can easily handle compute-heavy workloads yet are versatile enough for users to find an optimal choice for applications where performance, productivity, and efficiency matter.

Support for Server OS

GIGABYTE has validated platforms for compatibility with Windows Server, Ubuntu, and RHEL for greater manageability and security.

Ease of Management

GIGABYTE servers come with GIGABYTE Management Console for IPMI management. And with a server OS, greater management and control is possible.

Continuous Operation

Systems have RAS features for continuous uptime and availability as users require and expect stable performance around the clock.

Energy Efficient

Our engineers have created a highly eco-friendly entry level server platform for EPYC 4004 with fan profiles and a PSU with efficiency ≥ 89%.

Performance

Up to 16 cores and 32 threads, AMD EPYC 4004 can reach its potential in GIGABYTE platforms for mission-critical and general-purpose server workloads.
